1. About Us:

Section: 1. Who we Are:

Powering Banking, Financial Services & Capital Markets with AI, Data & Intelligent Innovation

Stafron Intelligence Corporation is a next-generation enterprise technology company dedicated to empowering the **Banking, Financial Services, and Capital Markets (BFSM)** industry through innovative AI, enterprise data, and intelligent automation platforms.

We develop enterprise-grade products that help financial institutions modernize operations, optimize revenue, improve data intelligence, automate business

processes, and accelerate digital transformation. Our solutions are designed to solve complex business challenges while enabling organizations to operate more efficiently, make smarter decisions, and deliver exceptional customer experiences.

With deep domain expertise in banking and financial services, combined with modern engineering and AI capabilities, we develop secure, scalable, and enterprise-grade platforms designed to address the evolving needs of today's financial ecosystem.

Our flagship platforms include:

- **RevNexure** – AI-powered Revenue Assurance Platform that helps identify, prevent, and recover revenue leakages across banking operations.
- **DataXentra** – Enterprise Data Platform that unifies, governs, and transforms enterprise data into trusted business intelligence.
- **AgenNova** – AI Intelligence Platform that enables intelligent automation, AI agents, predictive insights, and decision intelligence.

As a product-driven organization, our commitment is to deliver innovative, secure, and scalable technology solutions that help financial institutions thrive in an increasingly digital world.

At Stafrof, we embrace customer-centric innovation and design thinking to solve complex business challenges. By combining advanced analytics, responsible AI, and enterprise technology, we help organizations improve operational efficiency, strengthen compliance, enhance customer experiences, and drive sustainable growth.

Our commitment is to empower banks, financial institutions, and capital market organizations with intelligent technologies that enable them to innovate with confidence, operate with agility, and compete successfully in an increasingly digital world.

Our Purpose

To empower financial institutions with intelligent technologies that simplify complexity, accelerate innovation, and create lasting business value.

Section: 2. Our Vision

To become a globally trusted enterprise technology company, empowering the future of Banking, Financial Services, and Capital Markets through AI, data, and intelligent innovation.

Mission

To help financial institutions accelerate digital transformation by delivering innovative, secure, and scalable AI-powered platforms that unlock the value of data, optimize business performance, automate operations, and enable intelligent decision-making.

Our Core Values

Customer First

We put our customers at the center of everything we do, creating solutions that address real business challenges and deliver measurable outcomes.

Innovation

We embrace curiosity, creativity, and continuous improvement to develop technologies that shape the future of financial services.

Excellence

We strive for the highest standards in engineering, product quality, service delivery, and customer experience.

Security & Trust

We design our platforms with security, privacy, and reliability at the core, helping customers operate with confidence.

Section 3. Board of Directors

TBD (will publish later)

Section 4. Leadership Team

TBD (will publish later)

Section 5. Our Design Thinking Principles

At Stafrof, we place people, business value, and innovation at the center of every solution we create. Our design thinking approach helps us solve complex challenges through collaboration, creativity, and continuous improvement.

Empathize

Understand customer needs, challenges, and business goals.

Define

Identify the right problems before designing solutions.

Ideate

Generate innovative ideas that create measurable business value.

Prototype

Design and validate solutions quickly through iterative development.

Test

Continuously evaluate, refine, and improve based on real-world feedback.

Deliver Value

Transform ideas into scalable, secure, and intelligent solutions that drive business outcomes.

Our Design Philosophy

Human-Centered. Data-Driven. AI-Powered.

We combine deep industry expertise, design thinking, advanced analytics, and artificial intelligence to deliver innovative solutions that help financial institutions innovate with confidence and achieve sustainable growth.

Section 6. Our AI Principles

At Stafrof, we believe Artificial Intelligence should be responsible, transparent, secure, and focused on delivering measurable business value. Our AI principles guide how we design, develop, and deploy intelligent solutions for the Banking, Financial Services, and Capital Markets industry.

Human-Centered AI

AI is designed to empower people and support better decision-making.

Responsible AI

We develop AI solutions with fairness, accountability, and ethical considerations.

Explainable AI

We promote transparency by enabling understandable and trustworthy AI-driven insights.

Secure & Private

Security, privacy, and data protection are embedded into every AI solution.

Reliable & Scalable

Our AI platforms are built for enterprise-grade performance, resilience, and scalability.

Business Value

We focus on delivering measurable outcomes that improve efficiency, reduce risk, and accelerate innovation.

Our AI Commitment

Building Trusted AI for Smarter Financial Services

We are committed to developing AI solutions that are secure, responsible, and designed to help financial institutions make better decisions, automate intelligently, and innovate with confidence.

This version is concise, enterprise-focused, and appropriate for a corporate website, especially for a company serving banking and financial services.

Section 7. Our Data Strategy

At Stafrof, we believe data is the foundation of intelligent enterprises. Our data strategy enables organizations to transform fragmented data into trusted, governed, and actionable insights that drive better business decisions and accelerate digital transformation.

Unified Data

Integrate enterprise data across systems to create a single, trusted source of truth.

Data Quality

Ensure data is accurate, consistent, complete, and reliable for business-critical decisions.

Data Governance

Establish strong governance, stewardship, and compliance to maximize the value of enterprise data.

Real-Time Intelligence

Enable timely insights with real-time data integration, analytics, and monitoring.

AI-Ready Data

Build high-quality, governed data foundations that power AI, analytics, and intelligent automation.

Security & Privacy

Protect enterprise data through robust security, privacy, and regulatory compliance.

Our Data Commitment

Transforming Data into Trusted Intelligence

We help organizations unlock the full value of their data by delivering secure, scalable, and intelligent data platforms that empower innovation, operational excellence, and sustainable business growth.

Section 8. What we do

We help **Banking, Financial Services, and Capital Markets** organizations accelerate digital transformation through enterprise AI, data, analytics, and intelligent automation. Our solutions enable financial institutions to modernize operations, optimize revenue, improve decision-making, and deliver exceptional customer experiences.

AI Revenue Assurance

Identify, prevent, and recover revenue leakages across banking products, services, and channels.

Enterprise Data Platform

Integrate, govern, and transform enterprise data into trusted, AI-ready intelligence.

AI Intelligence & Automation

Deploy intelligent AI agents, predictive analytics, and workflow automation to improve business performance.

Data Engineering & Analytics

Build scalable data foundations, real-time data pipelines, and advanced analytics solutions.

Intelligent Decision Support

Empower business leaders with actionable insights, executive dashboards, and AI-driven recommendations.

Digital Transformation

Modernize legacy systems, streamline operations, and accelerate innovation with cloud-native technologies.

Our Product Platforms

- **RevNexure** – AI Revenue Assurance Platform
- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Delivering Intelligent Solutions for Financial Services

From data to decisions, and from automation to innovation, we build secure, scalable, and enterprise-grade platforms that help financial institutions operate smarter, innovate faster, and create lasting business value.

Section 9: Industries We Serve

Stafron Intelligence Corporation delivers AI, data, and intelligent automation solutions that help organizations modernize operations, improve decision-making, and accelerate digital transformation across the financial services ecosystem.

Banking

Empowering retail, commercial, corporate, and digital banks with AI-driven platforms for revenue assurance, data intelligence, and operational excellence.

Financial Services

Helping financial institutions optimize operations, strengthen governance, automate processes, and unlock greater business value through intelligent technologies.

Capital Markets

Supporting capital market firms with advanced data, analytics, AI, and automation to improve operational efficiency, compliance, and business performance.

Fintech

Enabling fintech companies to build scalable, intelligent, and data-driven digital financial solutions that accelerate innovation and growth.

Our Industry Focus

We combine deep domain expertise with AI, enterprise data, and intelligent automation to help organizations innovate with confidence, operate efficiently, and create sustainable business value.

Primary Focus: Banking • Financial Services • Capital Markets • Fintech

Section 10: Why Stafrof

At Stafrof Intelligence Corporation, we combine deep industry expertise with AI, enterprise data, and modern engineering to help financial institutions solve complex business challenges and accelerate digital transformation. Our focus is on delivering intelligent, secure, and scalable solutions that create measurable business value.

Banking Domain Expertise

Purpose-built solutions for Banking, Financial Services, Capital Markets, and Fintech.

AI-Powered Innovation

Leverage Artificial Intelligence, Machine Learning, and Intelligent Automation to drive smarter business outcomes.

Enterprise Data Intelligence

Transform enterprise data into trusted, AI-ready insights for better decision-making.

Product-Led Innovation

Enterprise-grade platforms designed for scalability, flexibility, and future growth.

Secure by Design

Built with security, privacy, governance, and compliance at the core.

Scalable Architecture

Cloud-ready, API-first, and designed to integrate seamlessly with existing enterprise systems.

Customer-Centric Approach

We work closely with our customers to understand their challenges and deliver practical, value-driven solutions.

Engineering Excellence

Driven by quality, innovation, and continuous improvement in every product we build.

Our Commitment

We are committed to helping financial institutions innovate with confidence, unlock the full value of their data, and build a smarter, more resilient digital future.

Better Data. Smarter AI. Stronger Tomorrow.

Section 11: Innovation & R&D

Innovation is at the heart of everything we do. At Stafrof Intelligence Corporation, we continuously invest in research, emerging technologies, and product innovation to help financial institutions stay ahead in a rapidly evolving digital world.

Artificial Intelligence

Advancing AI solutions that enable intelligent decision-making, automation, and business optimization.

Enterprise Data

Building modern data platforms that transform enterprise data into trusted, AI-ready intelligence.

Intelligent Automation

Developing AI-powered automation to streamline operations, improve productivity, and reduce complexity.

Advanced Analytics

Delivering predictive insights and data-driven intelligence that empower better business decisions.

Cloud & Modern Architecture

Designing cloud-native, API-first, and scalable platforms for enterprise agility and future growth.

Continuous Innovation

Embracing emerging technologies, industry trends, and customer feedback to continuously enhance our products and solutions.

Our Innovation Commitment

We are committed to creating intelligent, secure, and future-ready technologies that empower Banking, Financial Services, and Capital Markets organizations to innovate faster, operate smarter, and achieve sustainable growth.

Innovating Today. Empowering Tomorrow.

Section 11: Our Commitment

At Stafrof Intelligence Corporation, we are committed to delivering innovative, secure, and enterprise-grade solutions that help Banking, Financial Services, and Capital Markets organizations achieve sustainable business success.

Customer Success

We focus on delivering measurable business value and building long-term customer relationships.

Innovation

We continuously innovate to solve complex business challenges with AI, data, and intelligent automation.

Quality

We are committed to engineering excellence, reliability, and delivering high-quality products.

Trust & Integrity

We conduct our business with honesty, transparency, and accountability.

Security & Privacy

We design our platforms with security, privacy, and compliance at the core.

Continuous Improvement

We embrace learning, feedback, and innovation to continuously enhance our products and services.

Our Promise

To be a trusted technology partner, delivering intelligent solutions that enable organizations to innovate with confidence, operate efficiently, and create lasting business value.

Section 12: Join our Journey

Be part of the future of Banking, Financial Services, and Capital Markets. Whether you're a customer, partner, investor, or talented professional, we invite you to join us in shaping the next generation of AI-powered enterprise solutions.

Partner with Us

Collaborate to deliver innovative technologies and create lasting business value.

[2. Banking Product Suites](#)

AI-Powered Revenue Assurance Platform for Banking, Financial Services & Capital Markets

RevNexure 360° Suite is Stafrof Intelligence Corporation's flagship AI-powered Revenue Assurance Platform, designed to help financial institutions identify, prevent, and recover revenue leakages while improving operational efficiency, compliance, and business performance.

Built on advanced AI, enterprise data, and intelligent automation, RevNexure 360° Suite delivers end-to-end revenue assurance across the entire revenue lifecycle—from transaction monitoring and reconciliation to anomaly detection, root cause analysis, case management, and revenue recovery.

Key Capabilities

Revenue Leakage Detection

Identify hidden revenue leakages across products, services, and transaction channels.

Intelligent Reconciliation

Automate reconciliation across multiple banking systems to ensure accuracy and completeness.

AI-Powered Anomaly Detection

Detect unusual patterns, pricing inconsistencies, and operational exceptions using AI and machine learning.

Root Cause Analysis

Quickly identify the source of revenue leakages with intelligent diagnostics and explainable insights.

Case Management

Manage investigations, track resolutions, assign ownership, and monitor recovery activities from a centralized workspace.

Revenue Recovery

Prioritize recovery opportunities and support efficient resolution of identified revenue leakages.

Executive Dashboards & Analytics

Monitor KPIs, revenue trends, operational performance, and business insights through interactive dashboards.

Intelligent Alerts

Receive proactive notifications on critical revenue risks, exceptions, and operational anomalies.

Solution Coverage

- Retail Banking
- Corporate Banking
- Commercial Banking
- Digital Banking
- Payments & Cards
- Lending
- Treasury
- Trade Finance
- Wealth Management
- Capital Markets

Business Benefits

- Reduce revenue leakage
- Increase revenue recovery
- Improve operational efficiency
- Enhance data accuracy
- Strengthen governance and compliance
- Accelerate decision-making with AI
- Improve customer confidence
- Drive sustainable business growth

Powered by Stafrof Platforms

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, these platforms provide a secure, scalable, and AI-ready foundation for modern revenue assurance.

Transform Revenue Assurance into a Strategic Advantage

RevNexure 360° Suite empowers financial institutions to move beyond traditional controls by leveraging AI, enterprise data, and intelligent automation to protect revenue, improve operational resilience, and deliver measurable business value.

REVNEXURE LENDING:

AI-Powered Revenue Assurance for Lending Operations

RevNexure Lending is an intelligent revenue assurance solution within the **RevNexure 360° Suite**, purpose-built to help banks and financial institutions identify, prevent, and recover revenue leakages across the entire lending lifecycle.

Powered by Artificial Intelligence, enterprise data, and intelligent automation, RevNexure Lending continuously monitors lending operations to validate pricing, interest calculations, fees, commissions, and loan transactions—ensuring revenue accuracy, regulatory compliance, and operational excellence.

Key Capabilities

Interest Income Assurance

Validate interest calculations, rate applications, accruals, and collections to ensure revenue accuracy.

Fee & Charge Assurance

Detect missed, undercharged, or incorrectly applied processing fees, documentation charges, penalties, and service fees.

Pricing Validation

Verify that loan pricing, spreads, discounts, and negotiated terms are applied correctly according to approved policies.

Commission Assurance

Ensure commissions and referral incentives are calculated and paid accurately.

Revenue Leakage Detection

Identify hidden revenue leakages using AI-driven rules, analytics, and anomaly detection.

Intelligent Reconciliation

Reconcile loan transactions across Core Banking, Loan Origination Systems (LOS), Loan Management Systems (LMS), and finance systems.

AI-Powered Anomaly Detection

Automatically identify unusual lending patterns, exceptions, and operational risks.

Root Cause Analysis

Pinpoint the source of revenue leakage and provide actionable recommendations for resolution.

Case Management

Manage investigations, assign ownership, monitor progress, and track revenue recovery activities.

Executive Dashboards

Gain real-time visibility into lending performance, revenue assurance KPIs, leakages, and recovery metrics.

Coverage Across the Lending Lifecycle

- Loan Origination
 - Credit Assessment
 - Loan Approval
 - Loan Disbursement
 - Interest Accrual
 - Fee & Charge Management
 - Loan Servicing
 - Repayments
 - Delinquency & Collections
 - Loan Closure
-

Business Benefits

- Reduce revenue leakage
 - Improve interest and fee accuracy
 - Strengthen pricing governance
 - Increase revenue recovery
 - Automate reconciliation and monitoring
 - Enhance regulatory compliance
 - Improve operational efficiency
 - Deliver real-time business insights
-

Powered by the Stafrof Platform

RevNexure Lending is powered by:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, they provide trusted data, AI-driven intelligence, and enterprise-scale automation for modern lending operations.

Transform Lending Revenue Assurance

RevNexure Lending helps banks move from reactive audits to proactive, AI-driven revenue assurance—protecting income, improving operational resilience, and enabling confident, data-driven decision-making throughout the lending lifecycle.

REVNEXURE CARDS

AI-Powered Revenue Assurance for Cards & Payment Operations

RevNexure Cards is an intelligent revenue assurance solution within the **RevNexure 360° Suite**, designed to help banks, card issuers, and payment organizations identify, prevent, and recover revenue leakages across the entire card payment lifecycle.

Powered by Artificial Intelligence, enterprise data, and intelligent automation, RevNexure Cards continuously validates interchange fees, merchant discount rates (MDR), annual fees, interest charges, transaction fees, commissions, and settlements—ensuring revenue accuracy, operational efficiency, and regulatory compliance.

Key Capabilities

Interchange Fee Assurance

Validate interchange fees for domestic and international card transactions.

Merchant Fee Assurance

Ensure Merchant Discount Rates (MDR), acquiring fees, and service charges are correctly calculated and collected.

Card Fee & Charge Validation

Monitor annual fees, joining fees, renewal fees, late payment charges, over-limit fees, and other card-related charges.

Interest Income Assurance

Verify finance charges, revolving interest, installment interest, and penalty interest calculations.

Cashback & Rewards Validation

Ensure loyalty points, cashback, and promotional offers are applied accurately according to business rules.

Settlement & Reconciliation

Reconcile card transactions across authorization, clearing, settlement, merchant acquiring, and general ledger systems.

AI-Powered Anomaly Detection

Identify unusual transaction patterns, pricing inconsistencies, missing charges, duplicate transactions, and revenue leakages.

Root Cause Analysis

Automatically determine the source of revenue leakage and recommend corrective actions.

Case Management

Manage investigations, assign cases, track resolutions, and monitor revenue recovery.

Executive Dashboards

Gain real-time visibility into card revenue, transaction performance, fee collection, leakages, and recovery metrics.

Coverage Across the Card Lifecycle

- Credit Cards
- Debit Cards
- Prepaid Cards
- Corporate Cards
- Merchant Acquiring
- Card Authorization
- Transaction Processing
- Clearing & Settlement
- Rewards & Loyalty
- Chargebacks & Disputes

Business Benefits

- Detect and prevent revenue leakage
- Improve fee and interest income accuracy
- Automate reconciliation and controls
- Reduce operational risk
- Enhance settlement accuracy
- Improve compliance and governance
- Accelerate revenue recovery
- Gain real-time operational insights

Powered by the Stafrof Platform

RevNexure Cards is powered by:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, they provide trusted data, AI-driven intelligence, and enterprise-scale automation for modern card and payment operations.

Transform Card Revenue Assurance

RevNexure Cards empowers financial institutions to protect card revenue, optimize fee collection, improve operational efficiency, and strengthen financial controls through AI-powered revenue assurance.

Protect Every Transaction. Maximize Every Revenue Opportunity.

REVENEXURE ATM CHANNELS

AI-Powered Revenue Assurance for ATM & Self-Service Banking Channels

RevNexure ATM Channels is an intelligent revenue assurance solution within the **RevNexure 360° Suite**, purpose-built to help banks identify, prevent, and recover revenue leakages across ATM and self-service banking operations.

Powered by Artificial Intelligence, enterprise data, and intelligent automation, RevNexure ATM Channels continuously monitors ATM transactions, interchange fees, surcharge fees, cash operations, settlements, and channel performance to ensure revenue accuracy, operational efficiency, and regulatory compliance.

Key Capabilities

ATM Transaction Assurance

Validate cash withdrawals, balance inquiries, mini statements, deposits, transfers, and value-added services to ensure accurate transaction processing and revenue recognition.

Interchange & Surcharge Fee Assurance

Verify domestic and international interchange fees, surcharge fees, and shared network charges are calculated and collected accurately.

Transaction Fee Validation

Monitor customer transaction fees, service charges, and ATM usage fees to identify missed, undercharged, or incorrectly applied charges.

ATM Settlement & Reconciliation

Reconcile ATM transactions across switch networks, Core Banking Systems, card management systems, payment gateways, and the General Ledger.

Cash Operations Monitoring

Track cash loading, replenishment, balancing, and cash discrepancies to improve operational control and reduce financial losses.

AI-Powered Anomaly Detection

Detect unusual transaction patterns, failed transactions, duplicate postings, settlement exceptions, and potential revenue leakages using AI-driven analytics.

Root Cause Analysis

Identify the underlying causes of transaction exceptions and revenue leakages with intelligent diagnostics and actionable recommendations.

Case Management

Manage investigations, assign ownership, monitor resolutions, and track revenue recovery from a centralized case management platform.

Executive Dashboards

Monitor ATM network performance, transaction volumes, fee income, revenue leakages, settlement status, and operational KPIs through real-time dashboards.

Coverage Across ATM & Self-Service Channels

- ATM Transactions
- Cash Withdrawals
- Cash Deposits
- Balance Enquiries
- Fund Transfers
- Mini Statements
- Cardless Cash Withdrawals

- Cash Recycling ATMs
 - Shared ATM Networks
 - Interchange & Settlement
 - ATM Switch Operations
 - Self-Service Banking Kiosks
-

Business Benefits

- Detect and prevent revenue leakages
 - Improve fee and interchange income accuracy
 - Automate ATM reconciliation and settlement
 - Reduce operational and financial risk
 - Strengthen governance and compliance
 - Optimize ATM cash operations
 - Improve customer service reliability
 - Gain real-time operational intelligence
-

Powered by the Stafrof Platform

RevNexure ATM Channels is powered by:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, they provide trusted enterprise data, AI-driven intelligence, and intelligent automation to modernize ATM revenue assurance and channel operations.

Transform ATM Revenue Assurance

RevNexure ATM Channels enables financial institutions to move from manual monitoring to proactive, AI-driven revenue assurance—ensuring every ATM transaction, fee, and settlement is accurately processed while maximizing revenue and operational efficiency.

Secure Every Transaction. Assure Every Revenue.

Request a Demo | Talk to Our ATM & Channel Experts

RevNexure Corporate

AI-Powered Revenue Assurance for Corporate Banking

RevNexure Corporate is an intelligent revenue assurance solution within the **RevNexure 360° Suite**, purpose-built to help banks identify, prevent, and recover revenue leakages across corporate banking products, services, and transaction channels.

Powered by Artificial Intelligence, enterprise data, and intelligent automation, RevNexure Corporate continuously validates pricing, fees, commissions, interest calculations, cash management services, trade transactions, and corporate

payments—ensuring revenue accuracy, operational efficiency, and regulatory compliance.

Key Capabilities

Corporate Pricing Assurance

Validate negotiated pricing, tariffs, discounts, and service agreements to ensure corporate customers are billed accurately according to contractual terms.

Fee & Charge Assurance

Monitor account maintenance fees, transaction charges, cash management fees, service charges, and other corporate banking fees to detect missed or incorrect billing.

Interest Income Assurance

Verify interest calculations for loans, overdrafts, deposits, and credit facilities based on approved rates and customer agreements.

Cash Management Revenue Assurance

Validate revenues from cash management services, collections, liquidity management, virtual accounts, and payment processing.

Corporate Payments Assurance

Monitor domestic, cross-border, RTGS, NEFT, SWIFT, and bulk payment transactions to ensure applicable charges and commissions are correctly applied.

Trade Finance Revenue Assurance

Validate fees and commissions related to Letters of Credit, Bank Guarantees, Documentary Collections, and Supply Chain Finance.

AI-Powered Anomaly Detection

Detect unusual pricing, billing exceptions, missing charges, duplicate transactions, and revenue leakages using AI-driven analytics.

Intelligent Reconciliation

Reconcile transactions across Core Banking Systems, Treasury, Trade Finance, Payment Platforms, ERP systems, and the General Ledger.

Root Cause Analysis

Identify the source of revenue leakages and provide actionable recommendations for rapid resolution.

Executive Dashboards

Gain real-time visibility into corporate banking revenue, pricing compliance, fee income, operational KPIs, and recovery performance.

Coverage Across Corporate Banking

- Corporate Current Accounts
- Corporate Lending
- Cash Management
- Liquidity Management
- Corporate Payments
- Trade Finance

- Supply Chain Finance
 - Foreign Exchange Services
 - Bank Guarantees
 - Letters of Credit
 - Corporate Deposits
 - Treasury Services
-

Business Benefits

- Detect and prevent revenue leakages
 - Improve pricing and billing accuracy
 - Maximize fee and interest income
 - Automate reconciliation and controls
 - Strengthen contractual compliance
 - Reduce operational risk
 - Accelerate revenue recovery
 - Improve profitability and operational efficiency
-

Powered by the Stafrof Platform

RevNexure Corporate is powered by:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, they provide trusted enterprise data, AI-driven intelligence, and intelligent automation to modernize corporate banking revenue assurance.

Transform Corporate Banking Revenue Assurance

RevNexure Corporate enables banks to proactively protect corporate banking revenue by validating pricing, monitoring transactions, automating controls, and identifying revenue leakages before they impact profitability.

Protect Every Agreement. Assure Every Revenue.

RevNexure Trade Finance

AI-Powered Revenue Assurance for Trade Finance Operations

RevNexure Trade Finance is an intelligent revenue assurance solution within the **RevNexure 360° Suite**, purpose-built to help banks identify, prevent, and recover revenue leakages across trade finance products, transactions, and services.

Powered by Artificial Intelligence, enterprise data, and intelligent automation, RevNexure Trade Finance continuously validates fees, commissions, interest, foreign exchange charges, guarantees, and trade transactions—ensuring revenue accuracy, operational efficiency, regulatory compliance, and risk management.

Key Capabilities

Trade Fee & Commission Assurance

Validate issuance, amendment, advising, confirmation, negotiation, discrepancy, and handling fees to ensure accurate billing and revenue collection.

Letter of Credit (LC) Assurance

Monitor import and export Letters of Credit to verify charges, commissions, expiry extensions, and utilization fees.

Bank Guarantee Assurance

Ensure issuance, amendment, renewal, claim processing, and cancellation fees are applied accurately throughout the guarantee lifecycle.

Documentary Collections Assurance

Validate commissions, handling charges, acceptance fees, and collection-related revenues for import and export collections.

Supply Chain Finance Assurance

Verify supplier finance, buyer finance, invoice discounting, and receivables financing charges are correctly calculated and collected.

Foreign Exchange Charge Validation

Monitor FX spreads, conversion rates, exchange margins, and transaction charges associated with international trade transactions.

Interest Income Assurance

Validate interest calculations for trade finance facilities, pre-shipment finance, post-shipment finance, and export credit products.

AI-Powered Anomaly Detection

Identify missing fees, pricing inconsistencies, unauthorized waivers, duplicate transactions, and revenue leakages using AI-driven analytics.

Intelligent Reconciliation

Reconcile trade transactions across Core Banking, Trade Finance Systems, Treasury, SWIFT, Finance, and General Ledger platforms.

Root Cause Analysis & Case Management

Automatically identify the source of revenue leakages, assign investigations, track resolutions, and monitor revenue recovery activities.

Executive Dashboards

Provide real-time visibility into trade finance revenue, operational performance, pricing compliance, transaction volumes, and recovery metrics.

Coverage Across Trade Finance

- Import Letters of Credit
- Export Letters of Credit
- Standby Letters of Credit
- Bank Guarantees
- Documentary Collections
- Supply Chain Finance
- Export Finance
- Import Finance
- Bills for Collection

- Bills Discounting
 - Trade Loans
 - Foreign Exchange Transactions
-

Business Benefits

- Detect and prevent revenue leakages
 - Improve fee, commission, and interest income accuracy
 - Strengthen pricing and tariff compliance
 - Automate reconciliation and operational controls
 - Reduce operational and financial risk
 - Enhance regulatory compliance
 - Accelerate revenue recovery
 - Improve profitability and operational efficiency
-

Powered by the Stafrof Platform

RevNexure Trade Finance is powered by:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, they provide trusted enterprise data, AI-driven intelligence, and intelligent automation to modernize trade finance revenue assurance.

Transform Trade Finance Revenue Assurance

RevNexure Trade Finance enables financial institutions to proactively protect trade finance revenue by validating pricing, monitoring transactions, automating controls, and identifying revenue leakages across the entire trade finance lifecycle.

RevNexure Forex

AI-Powered Revenue Assurance for Foreign Exchange Operations

RevNexure Forex is an intelligent revenue assurance solution within the **RevNexure 360° Suite**, purpose-built to help banks and financial institutions identify, prevent, and recover revenue leakages across foreign exchange operations and cross-border transactions.

Powered by Artificial Intelligence, enterprise data, and intelligent automation, RevNexure Forex continuously validates exchange rates, FX spreads, commissions, fees, margins, settlements, and trade transactions—ensuring revenue accuracy, operational efficiency, regulatory compliance, and risk management.

Key Capabilities

FX Pricing Assurance

Validate exchange rates, negotiated pricing, FX spreads, markups, and margins to ensure accurate revenue realization.

FX Fee & Commission Assurance

Monitor transaction fees, service charges, brokerage, and commissions to detect missed, undercharged, or incorrectly applied charges.

Foreign Exchange Margin Assurance

Verify that FX margins are calculated and applied in accordance with approved pricing policies and customer agreements.

Cross-Border Payment Assurance

Validate charges associated with international wire transfers, SWIFT payments, correspondent banking, and remittances.

Treasury Transaction Assurance

Monitor foreign exchange trades, spot, forward, swap, and derivative transactions to ensure pricing accuracy and revenue integrity.

Settlement & Reconciliation

Reconcile FX transactions across Treasury Systems, Core Banking, SWIFT, Trading Platforms, Payment Systems, and the General Ledger.

AI-Powered Anomaly Detection

Identify unusual pricing patterns, unauthorized rate overrides, duplicate transactions, missing charges, and revenue leakages using AI-driven analytics.

Root Cause Analysis

Automatically identify the source of revenue leakages and provide intelligent recommendations for corrective actions.

Case Management

Manage investigations, assign ownership, monitor resolutions, and track revenue recovery through an integrated workflow.

Executive Dashboards

Gain real-time visibility into FX revenue, spreads, transaction volumes, settlement performance, operational KPIs, and recovery metrics.

Coverage Across Foreign Exchange Operations

- Spot Foreign Exchange
- Forward Contracts
- FX Swaps
- Currency Options
- Cross-Border Payments
- International Remittances
- SWIFT Transactions
- Correspondent Banking
- Treasury Operations
- Interbank Foreign Exchange
- Corporate FX Services
- Retail Foreign Exchange

Business Benefits

- Detect and prevent revenue leakages

- Improve FX pricing and margin accuracy
 - Maximize fee and commission income
 - Strengthen pricing governance
 - Automate reconciliation and operational controls
 - Reduce financial and operational risk
 - Enhance regulatory compliance
 - Accelerate revenue recovery
-

Powered by the Stafrof Platform

RevNexure Forex is powered by:

- **DataXentra** – Enterprise Data Platform

RevNexure Securities

AI-Powered Revenue Assurance for Securities Operations

RevNexure Securities is an intelligent revenue assurance solution within the **RevNexure 360° Suite**, purpose-built to help banks, brokerages, custodians, and capital market institutions identify, prevent, and recover revenue leakages across securities trading and investment operations.

Powered by Artificial Intelligence, enterprise data, and intelligent automation, RevNexure Securities continuously validates brokerage fees, commissions, transaction charges, custody fees, settlement charges, and securities-related revenues—ensuring revenue accuracy, operational efficiency, regulatory compliance, and business performance.

Key Capabilities

Brokerage Fee Assurance

Validate brokerage charges, negotiated tariffs, and commission structures to ensure accurate billing and revenue realization.

Securities Transaction Assurance

Monitor equity, fixed income, mutual fund, ETF, and other securities transactions to verify applicable fees and charges.

Custody Fee Assurance

Ensure custody, safekeeping, administration, and portfolio service fees are accurately calculated and collected.

Settlement Fee Assurance

Validate clearing, settlement, exchange, depository, and processing charges throughout the trade lifecycle.

Corporate Actions Revenue Assurance

Verify fees related to dividends, bonus issues, rights issues, stock splits, mergers, acquisitions, and other corporate actions.

Portfolio & Investment Service Charges

Monitor advisory fees, portfolio management charges, and investment administration fees to identify missed or undercharged revenues.

AI-Powered Anomaly Detection

Detect pricing inconsistencies, missing charges, duplicate transactions, unauthorized fee waivers, and revenue leakages using AI-driven analytics.

Intelligent Reconciliation

Reconcile transactions across Trading Platforms, Order Management Systems (OMS), Exchange Systems, Depositories, Custody Platforms, Core Banking, and the General Ledger.

Root Cause Analysis

Automatically identify the source of revenue leakages and provide actionable recommendations for rapid resolution.

Executive Dashboards

Monitor securities revenue, trading volumes, brokerage income, settlement status, operational KPIs, and recovery performance through real-time dashboards.

Coverage Across Securities Operations

- Equities
- Fixed Income Securities
- Government Securities
- Mutual Funds
- Exchange Traded Funds (ETFs)
- Bonds
- Initial Public Offerings (IPOs)
- Corporate Actions
- Brokerage Services
- Custody Services
- Clearing & Settlement
- Investment Services

Business Benefits

- Detect and prevent revenue leakages
- Improve brokerage and fee income accuracy
- Strengthen pricing and tariff compliance

- Automate reconciliation and operational controls
 - Reduce financial and operational risk
 - Enhance regulatory compliance
 - Accelerate revenue recovery
 - Improve profitability and operational efficiency
-

Powered by the Stafrof Platform

RevNexure Securities is powered by:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, they provide trusted enterprise data, AI-driven intelligence, and intelligent automation to modernize securities revenue assurance.

Transform Securities Revenue Assurance

RevNexure Securities enables financial institutions to proactively protect securities revenue by validating pricing, monitoring transactions, automating controls, and identifying revenue leakages across the complete securities transaction lifecycle.

Protect Every Trade. Assure Every Revenue.

RevNexure Settlement

AI-Powered Revenue Assurance for Settlement Operations

RevNexure Settlement is an intelligent revenue assurance solution within the **RevNexure 360° Suite**, purpose-built to help banks, financial institutions, and capital market organizations identify, prevent, and recover revenue leakages across payment, securities, and financial settlement operations.

Powered by Artificial Intelligence, enterprise data, and intelligent automation, RevNexure Settlement continuously validates settlement fees, transaction charges, clearing activities, reconciliations, and financial postings—ensuring revenue accuracy, operational efficiency, regulatory compliance, and operational resilience.

Key Capabilities

Settlement Fee Assurance

Validate settlement fees, processing charges, clearing fees, and service tariffs to ensure accurate revenue collection.

Financial Reconciliation

Automatically reconcile transactions across Core Banking, Payment Systems, Treasury, Securities Platforms, Clearing Houses, and the General Ledger.

Clearing & Settlement Validation

Monitor clearing and settlement activities to identify missing, delayed, failed, or duplicate settlements that may impact revenue.

Transaction Charge Assurance

Verify that transaction processing fees, settlement commissions, and service charges are correctly calculated and collected.

Exception Management

Identify settlement breaks, unmatched transactions, posting discrepancies, and operational exceptions for timely resolution.

AI-Powered Anomaly Detection

Detect unusual settlement patterns, pricing inconsistencies, duplicate postings, missing charges, and revenue leakages using AI-driven analytics.

Root Cause Analysis

Automatically determine the source of settlement exceptions and revenue leakages, enabling faster corrective actions.

Case Management

Manage investigations, assign ownership, track resolutions, and monitor revenue recovery through an integrated workflow.

Executive Dashboards

Gain real-time visibility into settlement performance, revenue assurance KPIs, reconciliation status, operational exceptions, and recovery metrics.

Coverage Across Settlement Operations

- Payment Settlements
- Securities Settlements
- RTGS & NEFT Settlements
- SWIFT Settlements
- Card & ATM Settlements
- Treasury Settlements
- Foreign Exchange Settlements
- Clearing House Operations
- Interbank Settlements
- General Ledger Reconciliation
- Nostro & Vostro Reconciliation
- Cross-Border Settlements

Business Benefits

- Detect and prevent revenue leakages
- Improve settlement accuracy and efficiency
- Automate reconciliation across enterprise systems
- Reduce settlement failures and operational risk
- Strengthen financial controls and governance
- Enhance regulatory compliance
- Accelerate issue resolution and revenue recovery
- Improve operational visibility through real-time dashboards

Powered by the Stafrof Platform

RevNexure Settlement is powered by:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, they provide trusted enterprise data, AI-driven intelligence, and intelligent automation to modernize settlement revenue assurance and financial operations.

Transform Settlement Revenue Assurance

RevNexure Settlement enables financial institutions to proactively protect settlement revenue by validating fees, automating reconciliation, identifying operational exceptions, and ensuring every transaction is settled accurately and efficiently.

Every Transaction Settled. Every Revenue Assured.

Request a Demo | Talk to Our Settlement Experts

RevNexure Wealth Management

AI-Powered Revenue Assurance for Wealth Management

RevNexure Wealth Management is an intelligent revenue assurance solution within the **RevNexure 360° Suite**, purpose-built to help banks, private banks, wealth managers, and investment firms identify, prevent, and recover revenue leakages across wealth management products and advisory services.

Powered by Artificial Intelligence, enterprise data, and intelligent automation, RevNexure Wealth Management continuously validates advisory fees, portfolio management charges, transaction commissions, distribution fees, and investment service revenues—ensuring revenue accuracy, operational efficiency, regulatory compliance, and superior client service.

Key Capabilities

Advisory Fee Assurance

Validate advisory and financial planning fees based on client agreements, assets under management (AUM), and service levels.

Portfolio Management Fee Assurance

Ensure portfolio management fees, performance fees, and recurring management charges are accurately calculated and collected.

Investment Transaction Assurance

Monitor commissions and charges across equities, bonds, mutual funds, ETFs, structured products, and alternative investments.

Distribution & Commission Assurance

Validate commissions earned from mutual funds, insurance products, investment products, and third-party distribution arrangements.

Assets Under Management (AUM) Validation

Verify AUM calculations to ensure accurate fee billing and revenue recognition.

Client Pricing & Billing Assurance

Monitor negotiated pricing, fee waivers, discounts, and preferential tariffs to ensure compliance with client agreements.

AI-Powered Anomaly Detection

Identify missing fees, pricing inconsistencies, unauthorized fee waivers, duplicate transactions, and revenue leakages using AI-driven analytics.

Intelligent Reconciliation

Reconcile transactions across Wealth Management Platforms, Portfolio Management Systems, Trading Systems, Custody Platforms, Core Banking, and the General Ledger.

Root Cause Analysis

Automatically identify the source of revenue leakages and provide intelligent recommendations for corrective actions.

Executive Dashboards

Monitor AUM, advisory revenue, fee income, portfolio performance, operational KPIs, and recovery metrics through interactive dashboards.

Coverage Across Wealth Management

- Private Banking
 - Portfolio Management
 - Investment Advisory
 - Mutual Funds
 - Exchange Traded Funds (ETFs)
 - Equities
 - Fixed Income Investments
 - Structured Products
 - Alternative Investments
 - Insurance Investment Products
 - Retirement & Pension Solutions
 - Family Office Services
-

Business Benefits

- Detect and prevent revenue leakages
 - Improve advisory and management fee accuracy
 - Maximize investment-related revenue
 - Strengthen pricing and billing governance
 - Automate reconciliation and operational controls
 - Reduce financial and operational risk
 - Enhance regulatory compliance
 - Accelerate revenue recovery
-

Powered by the Stafrof Platform

RevNexure Wealth Management is powered by:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, they provide trusted enterprise data, AI-driven intelligence, and intelligent automation to modernize wealth management revenue assurance.

Transform Wealth Management Revenue Assurance

RevNexure Wealth Management enables financial institutions to proactively protect wealth management revenue by validating pricing, monitoring investment transactions, automating controls, and identifying revenue leakages across the entire client wealth lifecycle.

Protect Every Portfolio. Assure Every Revenue.

RevNexure Derivatives

AI-Powered Revenue Assurance for Derivatives Operations

RevNexure Derivatives is an intelligent revenue assurance solution within the **RevNexure 360° Suite**, purpose-built to help banks, financial institutions, and capital market firms identify, prevent, and recover revenue leakages across derivatives trading and post-trade operations.

Powered by Artificial Intelligence, enterprise data, and intelligent automation, RevNexure Derivatives continuously validates trading fees, brokerage, margins, commissions, financing charges, settlement activities, and derivative contract revenues—ensuring revenue accuracy, operational efficiency, regulatory compliance, and effective risk management.

Key Capabilities

Trading Fee Assurance

Validate brokerage, exchange fees, clearing charges, and transaction costs across derivative products.

Pricing & Valuation Assurance

Verify derivative pricing, premiums, spreads, mark-to-market valuations, and contract terms to ensure revenue integrity.

Margin & Collateral Assurance

Monitor initial margin, variation margin, collateral charges, and financing costs to ensure accurate calculations and billing.

Commission & Service Charge Assurance

Ensure commissions, advisory fees, execution charges, and other service fees are accurately applied and collected.

Contract Lifecycle Assurance

Validate fees and charges throughout the derivative lifecycle, including trade execution, amendments, novations, expiries, and settlements.

Clearing & Settlement Assurance

Reconcile derivative transactions across trading platforms, clearing houses, treasury systems, risk platforms, and the General Ledger.

AI-Powered Anomaly Detection

Identify pricing inconsistencies, missing charges, duplicate transactions, unauthorized overrides, and revenue leakages using AI-driven analytics.

Root Cause Analysis

Automatically identify the source of revenue leakages and provide actionable recommendations for faster resolution.

Case Management

Manage investigations, assign ownership, monitor resolutions, and track revenue recovery through an integrated workflow.

Executive Dashboards

Gain real-time visibility into derivative revenues, trading volumes, margin utilization, operational KPIs, and recovery performance.

Coverage Across Derivatives Operations

- Futures
 - Options
 - Interest Rate Derivatives
 - Foreign Exchange Derivatives
 - Commodity Derivatives
 - Credit Derivatives
 - Equity Derivatives
 - Swaps
 - Structured Derivatives
 - Exchange-Traded Derivatives
 - Over-the-Counter (OTC) Derivatives
 - Clearing & Settlement
-

Business Benefits

- Detect and prevent revenue leakages
 - Improve trading fee and commission accuracy
 - Strengthen pricing and margin governance
 - Automate reconciliation and operational controls
 - Reduce financial and operational risk
 - Enhance regulatory compliance
 - Accelerate revenue recovery
 - Improve profitability and operational efficiency
-

Powered by the Stafrof Platform

RevNexure Derivatives is powered by:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, they provide trusted enterprise data, AI-driven intelligence, and intelligent automation to modernize derivatives revenue assurance.

Transform Derivatives Revenue Assurance

RevNexure Derivatives enables financial institutions to proactively protect derivatives revenue by validating pricing, monitoring trading activities, automating controls, and identifying revenue leakages across the complete derivatives lifecycle.

Protect Every Trade. Assure Every Revenue.

RevNexure Custody Services

AI-Powered Revenue Assurance for Custody Services

RevNexure Custody Services is an intelligent revenue assurance solution within the **RevNexure 360° Suite**, purpose-built to help banks, custodian banks, asset servicers, and financial institutions identify, prevent, and recover revenue leakages across custody operations and asset servicing.

Powered by Artificial Intelligence, enterprise data, and intelligent automation, RevNexure Custody Services continuously validates custody fees, safekeeping charges, asset servicing fees, settlement charges, corporate action fees, and securities administration revenues—ensuring revenue accuracy, operational efficiency, regulatory compliance, and client confidence.

Key Capabilities

Custody Fee Assurance

Validate custody and safekeeping fees based on assets under custody (AUC), account structures, and client agreements.

Asset Servicing Fee Assurance

Monitor fees for corporate actions, income collection, proxy voting, tax services, securities lending, and investment administration.

Corporate Actions Revenue Assurance

Ensure fees related to dividends, interest payments, stock splits, rights issues, mergers, acquisitions, and other corporate actions are accurately calculated and billed.

Securities Settlement Assurance

Validate settlement processing fees, transfer charges, and depository service fees across domestic and international markets.

Client Billing & Pricing Assurance

Verify negotiated tariffs, service-level pricing, fee waivers, and client-specific billing arrangements to ensure contractual compliance.

Securities Lending & Borrowing Assurance

Monitor revenues from securities lending, borrowing, collateral management, and related service charges.

AI-Powered Anomaly Detection

Identify pricing inconsistencies, missing fees, duplicate billings, unauthorized fee waivers, and revenue leakages using AI-driven analytics.

Intelligent Reconciliation

Reconcile custody transactions across Custody Platforms, Core Banking Systems, Depositories, Trading Platforms, Asset Servicing Systems, and the General Ledger.

Root Cause Analysis

Automatically identify the source of revenue leakages and provide intelligent recommendations for rapid corrective actions.

Executive Dashboards

Gain real-time visibility into custody revenues, assets under custody, fee collections, operational KPIs, service performance, and recovery metrics.

Coverage Across Custody Services

- Asset Custody
 - Securities Safekeeping
 - Corporate Actions Processing
 - Securities Settlement
 - Income Collection
 - Proxy Voting Services
 - Tax Reclamation Services
 - Securities Lending & Borrowing
 - Collateral Management
 - Fund Administration
 - Global Custody
 - Asset Servicing
-

Business Benefits

- Detect and prevent revenue leakages
 - Improve custody fee and billing accuracy
 - Maximize asset servicing revenue
 - Strengthen pricing and contractual compliance
 - Automate reconciliation and operational controls
 - Reduce financial and operational risk
 - Enhance regulatory compliance
 - Accelerate revenue recovery
-

Powered by the Stafrof Platform

RevNexure Custody Services is powered by:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, they provide trusted enterprise data, AI-driven intelligence, and intelligent automation to modernize custody revenue assurance.

Transform Custody Revenue Assurance

RevNexure Custody Services enables financial institutions to proactively protect custody revenues by validating pricing, monitoring asset servicing operations,

automating controls, and identifying revenue leakages across the complete custody lifecycle.

Protect Every Asset. Assure Every Revenue.

RevNexure Merchant Payments

AI-Powered Revenue Assurance for Merchant Payments

RevNexure Merchant Payments is an intelligent revenue assurance solution within the **RevNexure 360° Suite**, purpose-built to help banks, payment service providers, merchant acquirers, and financial institutions identify, prevent, and recover revenue leakages across merchant payment operations.

Powered by Artificial Intelligence, enterprise data, and intelligent automation, RevNexure Merchant Payments continuously validates Merchant Discount Rates (MDR), acquiring fees, interchange fees, transaction charges, settlement fees, commissions, and merchant billing—ensuring revenue accuracy, operational efficiency, regulatory compliance, and business growth.

Key Capabilities

Merchant Fee Assurance

Validate Merchant Discount Rates (MDR), acquiring fees, processing fees, and service charges to ensure accurate billing and revenue collection.

Interchange Fee Assurance

Verify interchange fees across card schemes and payment networks to maximize revenue realization.

Merchant Pricing Assurance

Monitor merchant-specific pricing agreements, negotiated tariffs, discounts, and promotional pricing to ensure contractual compliance.

Transaction Fee Validation

Validate fees for card-present, card-not-present, QR code, contactless, e-commerce, and digital payment transactions.

Settlement & Reconciliation

Reconcile merchant transactions across payment gateways, acquiring platforms, card networks, Core Banking Systems, and the General Ledger.

Commission & Incentive Assurance

Ensure commissions, referral incentives, partner payouts, and channel fees are accurately calculated and processed.

Chargeback & Dispute Assurance

Monitor chargebacks, reversals, refunds, and dispute processing to identify revenue leakage and operational exceptions.

AI-Powered Anomaly Detection

Detect missing fees, pricing inconsistencies, duplicate settlements, unauthorized fee waivers, abnormal transaction patterns, and revenue leakages using AI-driven analytics.

Root Cause Analysis & Case Management

Automatically identify the source of revenue leakages, manage investigations, assign ownership, and track recovery activities through an integrated workflow.

Executive Dashboards

Monitor merchant revenues, transaction volumes, fee collections, settlement performance, operational KPIs, and revenue recovery through real-time dashboards.

Coverage Across Merchant Payments

- Merchant Acquiring
 - Point-of-Sale (POS) Payments
 - E-commerce Payments
 - Payment Gateways
 - QR Code Payments
 - Contactless Payments
 - Mobile Payments
 - Digital Wallet Transactions
 - Card Payments
 - Settlement Operations
 - Chargebacks & Disputes
 - Merchant Billing
-

Business Benefits

- Detect and prevent revenue leakages
 - Improve merchant fee and commission accuracy
 - Strengthen pricing and billing governance
 - Automate reconciliation and settlement controls
 - Reduce operational and financial risk
 - Enhance regulatory compliance
 - Accelerate revenue recovery
 - Improve profitability and merchant service performance
-

Powered by the Stafrof Platform

RevNexure Merchant Payments is powered by:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, they provide trusted enterprise data, AI-driven intelligence, and intelligent automation to modernize merchant payment revenue assurance.

Transform Merchant Payment Revenue Assurance

RevNexure Merchant Payments enables financial institutions to proactively protect merchant payment revenue by validating pricing, monitoring transactions, automating controls, and identifying revenue leakages across the entire merchant payments ecosystem.

Protect Every Payment. Maximize Every Revenue Opportunity.

3. Next-Gen Platforms

DataXentra Enterprise Data Platform

Unifying Enterprise Data. Powering Intelligent Decisions.

DataXentra Enterprise Data Platform is Stafron Intelligence Corporation's next-generation enterprise data platform, purpose-built to help Banking, Financial Services, and Capital Markets organizations integrate, govern, manage, and transform enterprise data into trusted, AI-ready intelligence.

Designed for modern data ecosystems, DataXentra seamlessly connects data across core banking systems, enterprise applications, cloud platforms, and external data sources—creating a unified, secure, and scalable data foundation that accelerates analytics, artificial intelligence, regulatory reporting, and digital transformation.

Key Capabilities

Enterprise Data Integration

Connect and integrate data from Core Banking Systems, CRM, ERP, payment platforms, treasury systems, data warehouses, cloud applications, APIs, and third-party sources.

Unified Data Management

Create a single, trusted view of enterprise data across customers, accounts, products, transactions, and operations.

Data Quality Management

Continuously profile, validate, standardize, cleanse, and enrich data to improve accuracy, consistency, and reliability.

Master Data Management (MDM)

Establish trusted master data for customers, products, counterparties, branches, and reference data across the enterprise.

Data Governance

Strengthen governance through metadata management, data lineage, business glossary, stewardship, policy management, and regulatory compliance.

Real-Time Data Processing

Capture, process, and distribute streaming and batch data for operational intelligence and real-time decision-making.

Enterprise Data Lakehouse

Store structured, semi-structured, and unstructured data in a scalable, cloud-ready architecture optimized for analytics and AI workloads.

AI-Ready Data Foundation

Prepare governed, high-quality data for Artificial Intelligence, Machine Learning, Generative AI, predictive analytics, and intelligent automation.

Self-Service Analytics

Enable business users with secure, governed access to trusted data for reporting, dashboards, and ad hoc analysis.

Security & Compliance

Protect enterprise data with role-based access control, encryption, auditing, data masking, privacy controls, and regulatory compliance.

Platform Components

- Enterprise Data Integration
 - Data Ingestion & Streaming
 - Data Quality Management
 - Master Data Management (MDM)
 - Metadata & Catalog
 - Data Governance
 - Data Lakehouse
 - Real-Time Data Processing
 - Analytics & Reporting
 - API & Integration Services
 - Security & Access Management
 - Monitoring & Operations
-

Business Benefits

- Create a single source of trusted enterprise data
 - Improve data quality and consistency
 - Accelerate AI and analytics initiatives
 - Simplify regulatory reporting and compliance
 - Enable real-time business insights
 - Reduce data silos and operational complexity
 - Improve decision-making across the enterprise
 - Scale securely with cloud-ready architecture
-

Industry Coverage

DataXentra is designed for:

- Banking
 - Financial Services
 - Capital Markets
 - Fintech
 - Insurance
 - Wealth Management
 - Payments
 - Treasury
 - Trade Finance
-

Powered for Intelligent Banking

DataXentra serves as the enterprise data foundation for Stafrof's intelligent product ecosystem, including:

- **RevNexure** – AI Revenue Assurance Platform
- **AgenNova** – AI Intelligence Platform

Together, these platforms enable financial institutions to transform enterprise data into actionable intelligence, automate critical business processes, and accelerate digital innovation.

Transform Enterprise Data into Business Value

DataXentra Enterprise Data Platform empowers organizations to move beyond fragmented data by creating a unified, governed, and AI-ready data foundation that drives operational excellence, regulatory confidence, and intelligent decision-making.

One Platform. Trusted Data. Intelligent Enterprise.

Request a Demo | Talk to Our Data Experts

AgenNova AI Intelligence Platform

Transforming Enterprise Intelligence with AI, Agentic AI & Intelligent Automation

AgenNova AI Intelligence Platform is Stafrof Intelligence Corporation's next-generation enterprise AI platform, purpose-built to help Banking, Financial Services, and Capital Markets organizations harness the power of Artificial Intelligence, Agentic AI, Machine Learning, and Intelligent Automation.

Designed for enterprise-scale adoption, AgenNova enables organizations to deploy intelligent AI agents, automate complex business processes, accelerate decision-making, and unlock actionable insights from enterprise data—all within a secure, scalable, and governed AI ecosystem.

Key Capabilities

Agentic AI

Deploy autonomous AI agents that collaborate, reason, plan, and execute complex business workflows with minimal human intervention.

Generative AI

Leverage Large Language Models (LLMs) to automate knowledge discovery, document processing, content generation, and enterprise search.

Intelligent Automation

Automate repetitive and business-critical processes using AI-driven workflows, orchestration, and decision intelligence.

Predictive Analytics

Forecast business outcomes, identify emerging trends, and detect risks using advanced machine learning and predictive models.

Decision Intelligence

Enable executives and business users with AI-powered recommendations, scenario analysis, and real-time decision support.

AI Knowledge Hub

Create an enterprise knowledge repository that combines structured and unstructured data to power intelligent search and contextual AI responses.

AI Governance

Manage AI models with built-in governance, monitoring, explainability, auditability, and responsible AI practices.

Enterprise AI Integration

Seamlessly integrate AI with Core Banking Systems, CRM, ERP, enterprise applications, APIs, and cloud platforms.

AI Monitoring & Observability

Monitor AI model performance, accuracy, drift, usage, and operational health through centralized dashboards and alerts.

Secure AI Platform

Protect enterprise AI with robust security, role-based access control, data privacy, encryption, and regulatory compliance.

Platform Components

- Agentic AI Framework
 - AI Agents & Multi-Agent Orchestration
 - Large Language Models (LLMs)
 - Retrieval-Augmented Generation (RAG)
 - Enterprise Knowledge Hub
 - Prompt Management
 - AI Workflow Orchestration
 - Predictive Analytics & Machine Learning
 - AI Governance & Explainability
 - API & Integration Services
 - Security & Access Management
 - AI Monitoring & Observability
-

Business Benefits

- Accelerate enterprise AI adoption
 - Automate complex business processes
 - Improve operational efficiency and productivity
 - Enhance decision-making with AI-driven insights
 - Reduce manual effort and operational costs
 - Deliver secure, responsible, and explainable AI
 - Scale AI across enterprise functions
 - Drive innovation and sustainable business growth
-

Industry Coverage

AgenNova is designed for:

- Banking

- Financial Services
- Capital Markets
- Fintech
- Insurance
- Wealth Management
- Payments
- Treasury
- Trade Finance

Powered by the Stafrof Ecosystem

AgenNova integrates seamlessly with:

- **DataXentra** – Enterprise Data Platform
- **RevNexure** – AI Revenue Assurance Platform

Together, these platforms create an intelligent enterprise ecosystem where trusted data, AI, and business automation work together to improve operational efficiency, optimize revenue, strengthen compliance, and accelerate digital transformation.

Transform Enterprise Intelligence

AgenNova AI Intelligence Platform empowers organizations to move beyond traditional automation by enabling intelligent AI agents, enterprise knowledge, predictive insights, and autonomous decision support—helping financial institutions innovate faster, operate smarter, and compete with confidence.

Intelligent AI. Autonomous Decisions. Accelerated Innovation.

[4. Solutions](#)

Revenue Assurance Solutions

Protect Revenue. Maximize Profitability. Drive Intelligent Growth.

Stafrof Intelligence Corporation delivers AI-powered Revenue Assurance Solutions that help Banking, Financial Services, and Capital Markets organizations identify, prevent, and recover revenue leakages across products, services, and transaction channels.

Powered by **RevNexure 360° Suite**, our solutions combine Artificial Intelligence, enterprise data, advanced analytics, and intelligent automation to continuously monitor business operations, validate revenue streams, detect anomalies, automate reconciliation, and improve operational performance.

Our Revenue Assurance Solutions

RevNexure Lending

Ensure accurate interest, fees, pricing, commissions, and loan transactions across the lending lifecycle.

RevNexure Cards

Validate interchange fees, merchant charges, annual fees, interest income, settlements, and card transaction revenues.

RevNexure ATM Channels

Monitor ATM transactions, interchange fees, surcharge fees, cash operations, and channel settlements.

RevNexure Corporate

Assure pricing, corporate banking fees, cash management revenues, trade finance charges, and payment services.

RevNexure Trade Finance

Validate Letters of Credit, Bank Guarantees, Documentary Collections, Supply Chain Finance, and foreign trade charges.

RevNexure Forex

Ensure FX pricing, spreads, margins, commissions, treasury transactions, and cross-border payment revenues are accurately realized.

RevNexure Securities

Monitor brokerage, custody, settlement, transaction fees, and investment service revenues across securities operations.

RevNexure Settlement

Validate clearing, settlement fees, financial postings, reconciliations, and transaction processing revenues.

RevNexure Wealth Management

Assure advisory fees, portfolio management charges, AUM-based billing, investment commissions, and client pricing.

RevNexure Derivatives

Validate trading fees, margins, premiums, commissions, clearing charges, and derivative contract revenues.

RevNexure Custody Services

Monitor custody fees, asset servicing charges, securities lending, corporate actions, and client billing.

RevNexure Merchant Payments

Validate Merchant Discount Rates (MDR), acquiring fees, payment gateway charges, settlement fees, and merchant billing.

Core Capabilities

- AI-Powered Revenue Leakage Detection
- Revenue Validation & Pricing Assurance
- Fee, Commission & Interest Verification
- Intelligent Reconciliation
- AI Anomaly Detection
- Root Cause Analysis
- Case Management
- Revenue Recovery Management
- Executive Dashboards & Analytics

- Real-Time Alerts & Monitoring
-

Business Benefits

- Detect and prevent revenue leakages
 - Improve revenue accuracy and profitability
 - Maximize fee, commission, and interest income
 - Strengthen pricing governance and compliance
 - Automate reconciliation and operational controls
 - Reduce operational and financial risk
 - Accelerate revenue recovery
 - Gain real-time business intelligence
 - Improve operational efficiency
 - Support sustainable business growth
-

Powered by the Stafron Platform

Our Revenue Assurance Solutions are powered by:

- **RevNexure 360° Suite** – AI Revenue Assurance Platform
- **DataXentra** – Enterprise Data Platform
- **Aggenova** – AI Intelligence Platform

Together, they provide a unified, AI-driven platform for intelligent revenue assurance across the entire Banking, Financial Services, and Capital Markets ecosystem.

Transform Revenue Assurance into a Competitive Advantage

Move beyond manual controls and periodic audits with intelligent, continuous revenue assurance. Stafron helps financial institutions protect every transaction, optimize every revenue stream, and build a stronger, more resilient business.

Protect Every Transaction. Assure Every Revenue.

Data Engineering & Analytics Solutions

Transforming Enterprise Data into Intelligent Business Insights

Stafron Intelligence Corporation delivers enterprise-grade **Data Engineering & Analytics Solutions** that help Banking, Financial Services, and Capital Markets organizations build trusted data foundations, unlock actionable insights, and accelerate AI-driven digital transformation.

Powered by **DataXentra Enterprise Data Platform**, our solutions enable organizations to integrate, govern, process, and analyze enterprise data at scale—empowering better decision-making, operational excellence, and sustainable business growth.

Our Data Engineering & Analytics Solutions

Data Integration

Seamlessly integrate data from Core Banking Systems, CRM, ERP, payment platforms, treasury systems, cloud applications, APIs, and third-party sources.

Data Engineering

Design and build scalable, high-performance data pipelines for batch, real-time, and streaming data processing.

Data Quality Management

Profile, validate, standardize, cleanse, enrich, and monitor enterprise data to ensure accuracy and reliability.

Enterprise Data Lakehouse

Create a unified repository for structured, semi-structured, and unstructured data to support analytics and AI workloads.

Master Data Management (MDM)

Establish a trusted, consistent view of customers, products, accounts, and reference data across the enterprise.

Data Governance

Strengthen governance with metadata management, business glossary, data lineage, stewardship, policy management, and regulatory compliance.

Business Intelligence & Reporting

Deliver interactive dashboards, executive scorecards, operational reports, and self-service analytics for informed decision-making.

Advanced Analytics

Leverage predictive analytics, statistical models, and AI-driven insights to identify trends, optimize performance, and manage risk.

Real-Time Analytics

Monitor business operations, customer activities, and transactions with real-time data processing and operational intelligence.

AI-Ready Data Foundation

Prepare high-quality, governed enterprise data that powers Artificial Intelligence, Machine Learning, Generative AI, and intelligent automation.

Core Capabilities

- Enterprise Data Integration
- Batch & Real-Time Data Pipelines
- Data Lakehouse Architecture
- Data Quality & Profiling
- Master Data Management (MDM)
- Metadata & Data Catalog
- Data Governance & Compliance
- Business Intelligence & Dashboards
- Predictive Analytics
- Self-Service Analytics
- API & Data Services
- Data Security & Privacy

Business Benefits

- Eliminate data silos across the enterprise
- Improve data quality, consistency, and trust
- Accelerate AI and analytics initiatives
- Enable faster, data-driven decision-making
- Simplify regulatory reporting and compliance
- Increase operational efficiency
- Support real-time business intelligence
- Reduce data management complexity
- Scale securely with cloud-ready architecture
- Build a future-ready data foundation

Powered by the Stafrof Platform

Our Data Engineering & Analytics Solutions are powered by:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, they deliver a modern data ecosystem that transforms enterprise data into trusted intelligence, enabling organizations to innovate faster and compete with confidence.

Transform Data into Business Value

Build a trusted, AI-ready data foundation that powers analytics, automation, and intelligent decision-making across your enterprise.

Integrate Data. Generate Intelligence. Accelerate Innovation.

AI Intelligence Solutions

Transforming Enterprise Intelligence with AI, Agentic AI & Intelligent Automation

Stafrof Intelligence Corporation delivers enterprise-grade **AI Intelligence Solutions** that help Banking, Financial Services, and Capital Markets organizations accelerate digital transformation, automate business operations, enhance decision-making, and unlock the full value of enterprise data.

Powered by the **AgenNova AI Intelligence Platform**, our solutions combine Artificial Intelligence, Agentic AI, Machine Learning, Generative AI, and Intelligent Automation to enable organizations to operate smarter, respond faster, and innovate with confidence.

Our AI Intelligence Solutions

Agentic AI

Deploy autonomous AI agents that collaborate, reason, and execute complex business processes with minimal human intervention.

Generative AI

Leverage Large Language Models (LLMs) to automate enterprise search, document intelligence, knowledge management, and content generation.

Intelligent Automation

Automate repetitive and business-critical workflows to improve productivity, accuracy, and operational efficiency.

Predictive Analytics

Forecast trends, identify opportunities, detect risks, and support proactive business decision-making through advanced machine learning.

Decision Intelligence

Empower business leaders with AI-driven recommendations, scenario analysis, and real-time decision support.

Enterprise AI Assistants

Enable employees with intelligent virtual assistants that improve productivity, knowledge access, and customer interactions.

AI Knowledge Hub

Create a centralized enterprise knowledge repository powered by Retrieval-Augmented Generation (RAG) for accurate and contextual AI responses.

AI Governance

Ensure AI solutions are secure, explainable, ethical, and compliant through enterprise AI governance and monitoring.

AI Model Management

Develop, deploy, monitor, and optimize AI models across the enterprise with centralized lifecycle management.

Intelligent Document Processing

Extract, classify, validate, and process information from structured and unstructured documents using AI.

Core Capabilities

- Agentic AI & Multi-Agent Orchestration
- Generative AI & Large Language Models (LLMs)
- Retrieval-Augmented Generation (RAG)
- Enterprise AI Assistants
- Intelligent Workflow Automation
- Predictive Analytics & Machine Learning
- Decision Intelligence
- AI Knowledge Management
- AI Governance & Explainability
- Model Lifecycle Management
- API & Enterprise Integration
- Security, Privacy & Compliance

Business Benefits

- Accelerate enterprise AI adoption
 - Improve operational efficiency and productivity
 - Automate complex business processes
 - Enable faster, data-driven decision-making
 - Enhance customer and employee experiences
 - Reduce operational costs and manual effort
 - Strengthen governance and regulatory compliance
 - Scale AI securely across the enterprise
 - Increase business agility and innovation
 - Drive sustainable business growth
-

Powered by the Stafrof Platform

Our AI Intelligence Solutions are powered by:

- **AgenNova** – AI Intelligence Platform
- **DataXentra** – Enterprise Data Platform

Together, they provide the trusted data foundation and enterprise AI capabilities required to build intelligent, secure, and scalable business solutions.

Transform Intelligence into Business Value

Harness the power of AI to automate operations, enhance decision-making, and create a smarter, more agile enterprise. With Stafrof, AI becomes a strategic capability that drives measurable business outcomes.

Intelligent AI. Smarter Decisions. Accelerated Innovation.

Intelligent Automation Solutions

Automate Processes. Accelerate Decisions. Transform Operations.

Stafrof Intelligence Corporation delivers enterprise-grade **Intelligent Automation Solutions** that help Banking, Financial Services, and Capital Markets organizations automate complex business processes, improve operational efficiency, reduce costs, and accelerate digital transformation.

Powered by the **AgenNova AI Intelligence Platform**, our solutions combine Artificial Intelligence, Agentic AI, Machine Learning, Intelligent Document Processing, and Workflow Orchestration to automate end-to-end business operations while enabling faster, smarter, and more accurate decision-making.

Our Intelligent Automation Solutions

Agentic AI Automation

Deploy intelligent AI agents that autonomously execute, coordinate, and optimize business workflows across enterprise systems.

Workflow Automation

Digitize and automate end-to-end business processes with configurable, rule-driven workflows and approvals.

Intelligent Document Processing

Extract, classify, validate, and process structured and unstructured documents using AI and Optical Character Recognition (OCR).

Process Orchestration

Coordinate business processes, applications, APIs, and enterprise systems through intelligent workflow orchestration.

AI Decision Automation

Automate operational and business decisions using AI, predictive analytics, and business rules.

Enterprise Case Management

Manage investigations, approvals, exceptions, service requests, and operational cases through a centralized workflow platform.

Process Monitoring & Alerts

Continuously monitor business processes, detect exceptions, and generate proactive alerts for timely action.

Business Rules Engine

Configure and manage business rules, validations, and policies without complex coding.

Enterprise Integration

Integrate seamlessly with Core Banking Systems, CRM, ERP, payment platforms, cloud services, APIs, and third-party applications.

Operational Intelligence

Provide real-time dashboards, KPIs, workflow analytics, and performance monitoring to continuously optimize operations.

Core Capabilities

- Agentic AI & Multi-Agent Orchestration
- Intelligent Workflow Automation
- Business Rules Engine
- Intelligent Document Processing (IDP)
- AI Decision Intelligence
- Enterprise Case Management
- Process Monitoring & Alerts
- API & Enterprise Integration
- Real-Time Operational Dashboards
- AI Governance & Audit Trails
- Security, Privacy & Compliance
- Cloud-Native & Scalable Architecture

Business Benefits

- Automate repetitive and manual processes
- Improve productivity and operational efficiency
- Reduce processing time and operational costs

- Minimize human errors and operational risks
 - Accelerate decision-making with AI
 - Improve customer experience and service quality
 - Strengthen compliance and governance
 - Increase business agility and scalability
 - Enable end-to-end process visibility
 - Drive continuous operational improvement
-

Powered by the Stafrof Platform

Our Intelligent Automation Solutions are powered by:

- **AgenNova** – AI Intelligence Platform
- **DataXentra** – Enterprise Data Platform

Together, they provide intelligent automation, trusted enterprise data, and AI-driven decision-making to help organizations transform business operations at scale.

Transform Automation into Business Value

Move beyond traditional automation with AI-powered intelligent workflows that learn, adapt, and continuously optimize business operations. Stafrof helps organizations automate with confidence, improve efficiency, and achieve measurable business outcomes.

Automate Intelligently. Operate Efficiently. Innovate Continuously.

Risk & Compliance Solutions

Manage Risk. Ensure Compliance. Build Trust.

Stafrof Intelligence Corporation delivers enterprise-grade **Risk & Compliance Solutions** that help Banking, Financial Services, and Capital Markets organizations proactively identify risks, strengthen governance, ensure regulatory compliance, and improve operational resilience.

Powered by **DataXentra Enterprise Data Platform** and the **AgenNova AI Intelligence Platform**, our solutions leverage Artificial Intelligence, advanced analytics, enterprise data, and intelligent automation to provide real-time risk monitoring, regulatory reporting, compliance management, and intelligent decision support.

Our Risk & Compliance Solutions

Enterprise Risk Management

Identify, assess, monitor, and mitigate enterprise-wide risks through a centralized risk management framework.

Regulatory Compliance

Streamline compliance with regulatory requirements through automated monitoring, reporting, and audit-ready controls.

Financial Crime & AML

Strengthen Anti-Money Laundering (AML), Know Your Customer (KYC), sanctions screening, and transaction monitoring with AI-powered analytics.

Fraud Risk Management

Detect suspicious activities, anomalous transactions, and potential fraud using machine learning and real-time monitoring.

Operational Risk Management

Monitor operational events, process failures, control weaknesses, and business disruptions to reduce operational risk.

Credit Risk Analytics

Assess credit exposure, monitor portfolio performance, and support data-driven credit decisions.

Data Governance & Compliance

Ensure enterprise data quality, governance, privacy, and compliance with regulatory and organizational policies.

Audit & Control Management

Automate audit processes, evidence collection, issue tracking, and control assessments for improved governance.

AI Governance

Manage AI models with transparency, explainability, monitoring, and responsible AI practices.

Risk Dashboards & Reporting

Provide executives and risk teams with real-time dashboards, regulatory reports, KPIs, and actionable insights.

Core Capabilities

- Enterprise Risk Management
- Regulatory Compliance Monitoring
- AML & KYC Analytics
- Fraud Detection & Prevention
- Operational Risk Management
- Credit Risk Analytics
- Data Governance & Privacy
- Audit & Control Management
- AI Governance & Explainability
- Executive Dashboards & Reporting
- Intelligent Alerts & Notifications
- Security & Compliance Framework

Business Benefits

- Strengthen enterprise governance and compliance
- Detect and mitigate risks proactively
- Improve regulatory reporting accuracy
- Reduce fraud and financial crime exposure

- Enhance operational resilience
 - Automate compliance monitoring and controls
 - Improve audit readiness and transparency
 - Accelerate risk-based decision-making
 - Protect customer trust and organizational reputation
 - Support sustainable business growth
-

Powered by the Stafron Platform

Our Risk & Compliance Solutions are powered by:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, they provide trusted enterprise data, AI-driven intelligence, and intelligent automation to help organizations manage risk, ensure compliance, and make confident business decisions.

Transform Risk into Resilience

Move beyond reactive risk management with AI-powered insights, automated compliance, and real-time monitoring. Stafron helps financial institutions build resilient operations, strengthen governance, and confidently navigate an evolving regulatory landscape.

Manage Risk. Ensure Compliance. Build Trust.

Customer Intelligence Solutions

Understand Customers. Personalize Experiences. Drive Growth.

Stafron Intelligence Corporation delivers enterprise-grade **Customer Intelligence Solutions** that help Banking, Financial Services, and Capital Markets organizations gain a 360-degree view of customers, deliver personalized experiences, strengthen relationships, and accelerate business growth.

Powered by **DataXentra Enterprise Data Platform** and the **AgenNova AI Intelligence Platform**, our solutions combine Artificial Intelligence, advanced analytics, enterprise data, and intelligent automation to transform customer data into actionable insights and smarter business decisions.

Our Customer Intelligence Solutions

Customer 360

Create a unified, real-time view of each customer by consolidating data across products, channels, and interactions.

Customer Segmentation

Segment customers using AI-driven analytics based on demographics, behavior, financial profiles, and engagement patterns.

Customer Profitability Analytics

Measure customer lifetime value, profitability, product usage, and relationship performance to optimize business strategies.

Personalized Customer Engagement

Deliver personalized recommendations, offers, and communications based on customer preferences and behaviors.

Next Best Action

Use AI to recommend the most relevant products, services, and engagement strategies for every customer interaction.

Customer Journey Analytics

Monitor and optimize customer journeys across digital and physical channels to improve satisfaction and retention.

Customer Risk Intelligence

Identify customer risk indicators, early warning signals, and behavioral patterns to support informed business decisions.

Customer Churn Prediction

Predict customer attrition using AI and proactively implement retention strategies.

Cross-Sell & Up-Sell Intelligence

Identify opportunities to recommend relevant banking products and services that increase customer value.

Customer Insights Dashboards

Provide executives and relationship managers with real-time customer analytics, KPIs, trends, and actionable insights.

Core Capabilities

- Customer 360
- Customer Segmentation
- Customer Profitability Analytics
- Customer Journey Analytics
- AI-Powered Personalization
- Next Best Action
- Churn Prediction
- Cross-Sell & Up-Sell Analytics
- Executive Dashboards & Reporting
- AI-Driven Customer Insights
- Data Governance & Privacy
- Enterprise Integration

Business Benefits

- Gain a complete view of every customer
- Improve customer satisfaction and loyalty
- Deliver personalized customer experiences
- Increase cross-sell and up-sell opportunities
- Enhance customer retention and lifetime value

- Enable faster, data-driven decision-making
 - Improve marketing and sales effectiveness
 - Strengthen customer relationships
 - Drive sustainable revenue growth
 - Support regulatory compliance and data privacy
-

Powered by the Stafrof Platform

Our Customer Intelligence Solutions are powered by:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, they provide trusted enterprise data, AI-powered insights, and intelligent automation to help organizations better understand their customers and deliver exceptional experiences.

Transform Customer Data into Business Growth

Turn customer interactions into intelligent insights and lasting relationships. Stafrof helps financial institutions deliver personalized experiences, improve customer engagement, and create measurable business value through AI and data-driven intelligence.

Know Your Customers. Personalize Every Experience. Grow with Intelligence.

Business Intelligence Solutions

Transform Data into Actionable Business Intelligence

Stafrof Intelligence Corporation delivers enterprise-grade **Business Intelligence Solutions** that help Banking, Financial Services, and Capital Markets organizations transform enterprise data into meaningful insights, improve decision-making, monitor business performance, and accelerate digital transformation.

Powered by **DataXentra Enterprise Data Platform** and the **AgenNova AI Intelligence Platform**, our Business Intelligence Solutions provide real-time dashboards, advanced analytics, AI-driven insights, and executive reporting to enable smarter, faster, and more informed business decisions.

Our Business Intelligence Solutions

Executive Dashboards

Provide executives with real-time visibility into business performance, KPIs, operational metrics, and strategic insights.

Operational Reporting

Deliver accurate, timely, and interactive reports that support day-to-day operational management.

Performance Analytics

Monitor business performance across products, channels, customers, and operations to identify opportunities for improvement.

Real-Time Business Monitoring

Track critical business events, transactions, and operational KPIs through real-time dashboards and alerts.

Self-Service Analytics

Enable business users to explore trusted enterprise data, create reports, and generate insights without relying on IT teams.

AI-Powered Business Insights

Leverage Artificial Intelligence to identify trends, detect anomalies, predict outcomes, and provide intelligent recommendations.

Predictive & Prescriptive Analytics

Forecast business performance and recommend data-driven actions to improve operational and financial outcomes.

Regulatory & Compliance Reporting

Simplify regulatory reporting with automated report generation, data validation, and audit-ready information.

Financial & Revenue Analytics

Analyze revenue, profitability, operational costs, and financial performance to support strategic planning.

KPI & Scorecard Management

Define, monitor, and measure Key Performance Indicators (KPIs) across departments, products, and business units.

Core Capabilities

- Executive & Operational Dashboards
- Interactive Reporting
- Self-Service Analytics
- Real-Time Data Visualization
- AI-Powered Insights
- Predictive & Prescriptive Analytics
- KPI & Scorecard Management
- Financial & Revenue Analytics
- Regulatory Reporting
- Data Exploration & Drill-Down Analysis
- Enterprise Data Integration
- Secure Role-Based Access

Business Benefits

- Make faster, data-driven decisions
- Gain real-time visibility into business performance
- Improve operational efficiency and productivity
- Monitor KPIs with confidence
- Identify trends, risks, and growth opportunities
- Enhance financial and revenue performance

- Simplify regulatory and management reporting
 - Empower business users with self-service analytics
 - Increase organizational agility
 - Drive continuous business improvement
-

Powered by the Stafron Platform

Our Business Intelligence Solutions are powered by:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, they provide trusted enterprise data, AI-powered analytics, and intelligent decision support to help organizations transform information into measurable business value.

Transform Insights into Intelligent Decisions

Move beyond traditional reporting with real-time dashboards, AI-driven analytics, and enterprise intelligence. Stafron helps financial institutions make smarter decisions, improve performance, and achieve sustainable growth through trusted business intelligence.

Visualize Performance. Generate Insights. Drive Better Decisions.

Enterprise Integration Solutions

Connect Systems. Unify Data. Accelerate Digital Transformation.

Stafron Intelligence Corporation delivers enterprise-grade **Enterprise Integration Solutions** that help Banking, Financial Services, and Capital Markets organizations seamlessly connect applications, data, and business processes across the enterprise.

Powered by **DataXentra Enterprise Data Platform**, our solutions enable secure, scalable, and real-time integration between core banking systems, enterprise applications, cloud platforms, APIs, and third-party services—creating a connected digital ecosystem that drives operational efficiency and business agility.

Our Enterprise Integration Solutions

Application Integration

Connect enterprise applications to enable seamless data exchange and end-to-end business process integration.

API Integration

Develop, manage, and secure APIs to facilitate real-time communication between internal systems, partners, and digital channels.

Core Banking Integration

Integrate with Core Banking Systems, Loan Origination Systems (LOS), Loan Management Systems (LMS), payment platforms, treasury systems, and CRM applications.

Data Integration

Consolidate structured, semi-structured, and unstructured data from multiple enterprise and external sources into a unified data platform.

Real-Time Event Streaming

Capture and process real-time events and transactions to support operational intelligence and responsive business processes.

Cloud Integration

Enable secure connectivity across on-premises, cloud, and hybrid environments for modern enterprise architectures.

Workflow Integration

Integrate business workflows across applications to automate end-to-end operational processes.

File & Batch Integration

Support secure file transfers, scheduled batch processing, and high-volume data exchanges between enterprise systems.

Third-Party Integration

Integrate with fintech platforms, payment networks, regulatory systems, data providers, and external business partners.

Integration Monitoring

Monitor integration performance, message flows, API health, failures, and transaction status through centralized dashboards and alerts.

Core Capabilities

- Enterprise Application Integration (EAI)
- API Management & Integration
- Core Banking Integration
- Event-Driven Architecture
- Real-Time Data Streaming
- Batch & File-Based Integration
- Cloud & Hybrid Integration
- Workflow Orchestration
- Message Transformation & Routing
- Integration Monitoring & Alerts
- Security & Access Management
- Scalable API-First Architecture

Business Benefits

- Eliminate application and data silos
- Enable seamless enterprise connectivity
- Accelerate digital transformation initiatives
- Improve operational efficiency and agility
- Enable real-time information exchange
- Simplify system modernization and migration
- Reduce integration complexity and costs

- Improve data consistency and reliability
 - Support cloud adoption and hybrid architectures
 - Scale securely with enterprise-grade integration
-

Powered by the Stafrof Platform

Our Enterprise Integration Solutions are powered by:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, they provide a unified integration foundation that connects enterprise systems, enables trusted data exchange, and powers AI-driven business processes.

Build a Connected Enterprise

Break down silos and connect every application, process, and data source through a secure, scalable, and intelligent integration platform. Stafrof helps financial institutions create a connected enterprise that is agile, data-driven, and ready for the future.

Connect Everything. Integrate Intelligently. Innovate Faster.

[5. Services](#)

Revenue Assurance Services

Protect Revenue. Recover Value. Maximize Business Performance.

Stafrof Intelligence Corporation provides comprehensive **Revenue Assurance Services** that help Banking, Financial Services, and Capital Markets organizations identify, prevent, and recover revenue leakages while improving operational efficiency, governance, and profitability.

Leveraging our **RevNexure 360° Suite**, AI-driven analytics, enterprise data, and intelligent automation, we help financial institutions establish a proactive and continuous revenue assurance framework across products, services, and transaction channels.

Our Revenue Assurance Services

Revenue Assurance Assessment

Evaluate existing revenue assurance processes, identify control gaps, assess revenue risks, and define a strategic roadmap for improvement.

Revenue Leakage Assessment

Identify hidden revenue leakages across lending, cards, payments, treasury, trade finance, foreign exchange, wealth management, and other banking operations.

Revenue Assurance Strategy

Design enterprise-wide revenue assurance frameworks, governance models, policies, and operating procedures aligned with business objectives.

Revenue Assurance Implementation

Implement AI-powered revenue assurance solutions, business rules, workflows, dashboards, and monitoring frameworks tailored to your organization.

Revenue Recovery Advisory

Analyze identified leakages, quantify financial impact, prioritize recovery opportunities, and support revenue recovery initiatives.

Pricing & Tariff Validation

Review pricing models, fee structures, interest calculations, commissions, and customer agreements to ensure accurate revenue realization.

Reconciliation & Controls

Design and implement automated reconciliation processes and preventive controls across multiple banking systems and financial transactions.

Continuous Revenue Monitoring

Establish continuous AI-powered monitoring with real-time alerts, anomaly detection, executive dashboards, and performance reporting.

AI-Powered Revenue Analytics

Leverage Artificial Intelligence and predictive analytics to identify revenue trends, detect anomalies, and recommend proactive business actions.

Managed Revenue Assurance Services

Provide ongoing operational support, monitoring, rule optimization, reporting, and continuous improvement of the revenue assurance function.

Core Capabilities

- Revenue Assurance Strategy & Consulting
- Revenue Leakage Detection
- Revenue Recovery Management
- Pricing & Tariff Validation
- Interest, Fee & Commission Assurance
- AI-Powered Anomaly Detection
- Intelligent Reconciliation
- Executive Dashboards & Reporting
- Governance & Compliance
- Continuous Monitoring & Optimization

Business Benefits

- Identify and eliminate revenue leakages
- Maximize fee, commission, and interest income
- Improve pricing accuracy and billing integrity
- Strengthen financial controls and governance
- Automate revenue monitoring and reconciliation
- Accelerate revenue recovery
- Improve operational efficiency
- Reduce financial and operational risk
- Support regulatory compliance

- Increase profitability and sustainable business growth
-

Powered by the Stafrof Platform

Our Revenue Assurance Services are powered by:

- **RevNexure 360° Suite** – AI Revenue Assurance Platform
- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, they deliver an intelligent, data-driven approach to revenue assurance that helps financial institutions protect every revenue stream and improve financial performance.

Transform Revenue Assurance into a Strategic Advantage

From assessment and implementation to continuous monitoring and recovery, Stafrof partners with financial institutions to build a modern, AI-powered revenue assurance capability that delivers measurable business value.

Protect Every Revenue Stream. Recover Every Opportunity.

Data & AI Services

Transform Data into Intelligence. Accelerate AI-Driven Innovation.

Stafrof Intelligence Corporation delivers comprehensive **Data & AI Services** that help Banking, Financial Services, and Capital Markets organizations build modern data foundations, accelerate AI adoption, and unlock measurable business value.

Leveraging **DataXentra Enterprise Data Platform** and the **AgenNova AI Intelligence Platform**, we help organizations integrate, govern, analyze, and operationalize enterprise data while implementing Artificial Intelligence, Agentic AI, Machine Learning, and Intelligent Automation at scale.

Our Data & AI Services

Data Strategy & Advisory

Develop enterprise data strategies, operating models, and roadmaps aligned with business objectives and digital transformation initiatives.

Data Engineering

Design and implement scalable data pipelines, modern data architectures, and enterprise data platforms for real-time and batch processing.

Data Integration & Migration

Integrate and migrate data across Core Banking Systems, enterprise applications, cloud platforms, and third-party data sources.

Data Quality & Governance

Improve data quality, establish governance frameworks, manage metadata, and ensure regulatory compliance across the enterprise.

Master Data Management (MDM)

Create a trusted, consistent view of customers, products, accounts, and reference data across business functions.

AI Strategy & Advisory

Define AI roadmaps, identify high-value use cases, establish AI governance, and accelerate enterprise AI adoption.

AI & Machine Learning

Develop and deploy predictive models, intelligent algorithms, and AI solutions that improve business performance and decision-making.

Generative AI & Agentic AI

Implement enterprise AI assistants, intelligent agents, Retrieval-Augmented Generation (RAG), and workflow automation using Generative AI technologies.

Business Intelligence & Analytics

Deliver executive dashboards, self-service analytics, operational reporting, and AI-powered business insights.

AI Operations (AIOps)

Monitor AI models, optimize performance, manage model lifecycles, and ensure secure, reliable, and responsible AI operations.

Core Capabilities

- Enterprise Data Strategy
- Data Engineering & Integration
- Data Governance & Quality
- Master Data Management (MDM)
- Artificial Intelligence & Machine Learning
- Agentic AI & Generative AI
- Business Intelligence & Analytics
- AI Governance & Explainability
- Intelligent Automation
- Cloud Data Platforms
- API & Enterprise Integration
- Security, Privacy & Compliance

Business Benefits

- Accelerate enterprise AI adoption
- Build trusted, AI-ready data foundations
- Improve operational efficiency and productivity
- Enable faster, data-driven decision-making
- Improve data quality and governance
- Automate business processes with AI
- Reduce operational complexity and costs
- Strengthen regulatory compliance
- Scale securely across the enterprise
- Drive innovation and sustainable business growth

Powered by the Stafrof Platform

Our Data & AI Services are powered by:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, they provide a comprehensive ecosystem for enterprise data management, AI innovation, analytics, and intelligent automation.

Build an Intelligent Data-Driven Enterprise

Whether you're modernizing your data platform, implementing AI, or transforming business operations, Stafrof provides the expertise, technology, and innovation to help you achieve your digital transformation goals.

Trusted Data. Intelligent AI. Transformative Outcomes.

Digital Transformation Services

Reimagine Business. Accelerate Innovation. Drive Digital Excellence.

Stafrof Intelligence Corporation helps Banking, Financial Services, and Capital Markets organizations accelerate their digital transformation journey through AI, enterprise data, intelligent automation, and modern technology platforms.

Our Digital Transformation Services enable financial institutions to modernize legacy systems, optimize business processes, enhance customer experiences, and build agile, data-driven enterprises ready for the future.

Our Digital Transformation Services

Digital Transformation Strategy

Develop a clear digital transformation roadmap aligned with business objectives, technology priorities, and long-term growth.

Legacy Modernization

Modernize legacy banking applications, platforms, and infrastructure using cloud-native and API-first architectures.

Business Process Transformation

Redesign and optimize business processes through AI, intelligent automation, and digital workflows.

Enterprise Data Modernization

Build modern enterprise data platforms that provide trusted, AI-ready data for analytics and intelligent decision-making.

AI & Intelligent Automation

Implement Artificial Intelligence, Agentic AI, Machine Learning, and intelligent automation to improve productivity and operational efficiency.

Cloud Transformation

Migrate and modernize applications, data, and workloads across public, private, and hybrid cloud environments.

API & Integration Modernization

Connect enterprise systems through secure APIs and real-time integration to create a connected digital ecosystem.

Customer Experience Transformation

Deliver seamless, personalized, and digital-first customer experiences across channels.

Digital Governance

Establish governance frameworks, security controls, compliance policies, and operational standards for sustainable digital transformation.

Change Management & Adoption

Support organizational change through user enablement, training, and adoption strategies to maximize transformation success.

Core Capabilities

- Digital Transformation Strategy
 - Business Process Transformation
 - Legacy Application Modernization
 - Enterprise Data Modernization
 - Artificial Intelligence & Agentic AI
 - Intelligent Automation
 - Cloud Transformation
 - API & Enterprise Integration
 - Customer Experience Transformation
 - Digital Governance
 - Change Management
 - Security & Regulatory Compliance
-

Business Benefits

- Accelerate digital transformation initiatives
 - Modernize legacy technology platforms
 - Improve operational efficiency and agility
 - Enhance customer experience and engagement
 - Enable AI-powered decision-making
 - Reduce operational costs and complexity
 - Strengthen security and regulatory compliance
 - Increase business resilience and scalability
 - Foster innovation across the enterprise
 - Create sustainable competitive advantage
-

Powered by the Stafrof Platform

Our Digital Transformation Services are powered by:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

- **RevNexure 360° Suite** – AI Revenue Assurance Platform

Together, these platforms provide the foundation for intelligent, data-driven, and AI-enabled digital transformation across Banking, Financial Services, and Capital Markets.

Transform Today. Lead Tomorrow.

Digital transformation is more than technology—it is about creating intelligent, connected, and resilient organizations. Stafrof partners with financial institutions to deliver practical, scalable, and measurable transformation outcomes.

Modernize. Automate. Innovate.

Product Implementation Services

From Strategy to Successful Deployment

Stafrof Intelligence Corporation provides end-to-end **Product Implementation Services** to help Banking, Financial Services, and Capital Markets organizations successfully deploy, integrate, and optimize enterprise technology solutions.

Our implementation approach combines industry expertise, proven methodologies, and best practices to ensure seamless deployment, faster time-to-value, and successful business outcomes with minimal operational disruption.

Our Product Implementation Services

Solution Assessment

Evaluate business requirements, existing systems, and operational processes to define the optimal implementation approach.

Implementation Planning

Develop a comprehensive implementation roadmap, project plan, milestones, resource allocation, and risk management strategy.

Solution Configuration

Configure products, business rules, workflows, user roles, dashboards, and reporting based on business and regulatory requirements.

System Integration

Integrate with Core Banking Systems, CRM, ERP, payment platforms, treasury systems, APIs, cloud services, and third-party applications.

Data Migration

Extract, validate, cleanse, transform, and migrate enterprise data while ensuring data quality, integrity, and security.

Testing & Quality Assurance

Perform system integration testing (SIT), user acceptance testing (UAT), performance testing, and validation to ensure solution readiness.

Deployment & Go-Live

Execute production deployment with controlled rollout, operational readiness, and business continuity planning.

User Training & Knowledge Transfer

Provide administrator training, end-user enablement, technical documentation, and knowledge transfer to maximize solution adoption.

Post-Implementation Support

Deliver hypercare support, performance monitoring, issue resolution, and continuous optimization following deployment.

Continuous Enhancement

Continuously optimize configurations, business rules, integrations, and platform capabilities to meet evolving business needs.

Core Capabilities

- Solution Assessment & Planning
 - Product Configuration
 - Enterprise System Integration
 - Data Migration & Validation
 - API & Cloud Integration
 - Testing & Quality Assurance
 - Deployment & Go-Live Support
 - User Training & Knowledge Transfer
 - Post-Implementation Support
 - Performance Optimization
 - Project Governance
 - Security & Compliance
-

Business Benefits

- Accelerate implementation timelines
 - Reduce deployment risk and business disruption
 - Ensure seamless enterprise integration
 - Improve user adoption and productivity
 - Deliver faster return on investment
 - Maintain data quality and integrity
 - Strengthen operational readiness
 - Enable scalable future growth
 - Improve project governance and transparency
 - Maximize long-term business value
-

Powered by the Stafrof Platform

Our Product Implementation Services support the successful deployment of:

- **RevNexure 360° Suite** – AI Revenue Assurance Platform
- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Whether implementing a single solution or a complete enterprise transformation, our experts ensure every deployment is secure, scalable, and aligned with your business objectives.

Delivering Successful Outcomes

From planning and implementation to optimization and ongoing support, Stafrof is your trusted implementation partner, helping you realize the full value of your technology investment.

Plan with Confidence. Deploy with Precision. Succeed with Stafrof.

Managed Services

Proactive Management. Continuous Optimization. Business Continuity.

Stafrof Intelligence Corporation provides comprehensive **Managed Services** to help Banking, Financial Services, and Capital Markets organizations maximize the value, performance, and reliability of their enterprise platforms.

Our managed services combine proactive monitoring, expert support, intelligent automation, and continuous optimization to ensure your business-critical systems operate securely, efficiently, and without interruption.

Our Managed Services

Application Management

Monitor, maintain, and optimize enterprise applications to ensure high availability, performance, and reliability.

Platform Operations

Manage and support **RevNexure**, **DataXentra**, and **AgenNova** with proactive administration and operational excellence.

Monitoring & Support

Provide 24×7 monitoring, incident management, problem resolution, and performance optimization.

Performance Optimization

Continuously analyze system performance, identify bottlenecks, and optimize applications, databases, and infrastructure.

Release & Change Management

Plan, test, and deploy software updates, enhancements, and configuration changes with minimal business disruption.

Data Operations

Manage data quality, integrations, ETL pipelines, scheduled jobs, and data governance activities to ensure trusted enterprise data.

Security & Compliance Management

Monitor security controls, manage vulnerabilities, support audits, and ensure compliance with organizational and regulatory requirements.

Backup & Disaster Recovery

Protect business-critical systems through backup management, disaster recovery planning, and business continuity support.

Service Desk

Provide responsive technical support, service request management, and user assistance through a centralized support function.

Continuous Improvement

Continuously enhance platform performance, optimize business rules, and implement new capabilities aligned with evolving business needs.

Core Capabilities

- 24×7 Platform Monitoring
 - Application Management
 - Incident & Problem Management
 - Performance & Capacity Management
 - Release & Change Management
 - Data Operations & Integration Support
 - Security & Compliance Monitoring
 - Backup & Disaster Recovery
 - Service Desk & Technical Support
 - SLA-Based Service Delivery
 - Reporting & Governance
 - Continuous Service Improvement
-

Business Benefits

- Maximize platform availability and reliability
 - Reduce operational risks and downtime
 - Improve application performance
 - Ensure security and regulatory compliance
 - Accelerate issue resolution
 - Optimize operational costs
 - Enhance business continuity
 - Enable predictable, SLA-driven service delivery
 - Increase user satisfaction and productivity
 - Focus internal teams on strategic initiatives
-

Supported Platforms

Our Managed Services support:

- **RevNexure 360° Suite** – AI Revenue Assurance Platform
- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

We also provide managed support for integrated enterprise applications and technology ecosystems.

Your Trusted Managed Services Partner

Stafron delivers proactive, secure, and scalable managed services that keep your business-critical platforms performing at their best—allowing your organization to focus on innovation while we manage the operations.

Operate Smarter. Optimize Continuously. Innovate with Confidence.

Training & Enablement Services

Empower People. Accelerate Adoption. Maximize Business Value.

Stafron Intelligence Corporation provides comprehensive **Training & Enablement Services** to help Banking, Financial Services, and Capital Markets organizations successfully adopt, manage, and maximize the value of their technology investments.

Our structured learning programs equip business users, administrators, technical teams, and executives with the knowledge and skills needed to effectively leverage AI, enterprise data, intelligent automation, and digital transformation solutions.

Our Training & Enablement Services

End-User Training

Enable business users to confidently use enterprise applications, dashboards, workflows, and reporting tools.

Administrator Training

Train system administrators to configure, manage, monitor, and optimize enterprise platforms.

Technical Training

Equip IT teams with the knowledge to integrate, administer, extend, and support enterprise solutions.

AI & Data Literacy

Develop foundational knowledge of Artificial Intelligence, Agentic AI, enterprise data, analytics, and intelligent automation.

Product Training

Provide comprehensive training for:

- **RevNexure 360° Suite**
- **DataXentra Enterprise Data Platform**
- **AgenNova AI Intelligence Platform**

Business Process Enablement

Help users understand optimized business processes, operational workflows, governance models, and best practices.

Knowledge Transfer

Deliver technical documentation, operational guides, implementation knowledge, and best practices to internal teams.

Change Management

Support organizational adoption through communication, user readiness, stakeholder engagement, and adoption strategies.

Workshops & Hands-on Learning

Conduct instructor-led workshops, practical exercises, simulations, and real-world use case demonstrations.

Continuous Learning

Provide ongoing learning programs, refresher sessions, new feature enablement, and advanced training as business needs evolve.

Core Capabilities

- End-User Training
- Administrator Training
- Technical Enablement
- AI & Data Literacy
- Product Education
- Hands-on Workshops
- Knowledge Transfer
- Change Management
- Learning Documentation
- Best Practice Guidance
- Role-Based Learning Paths
- Continuous Learning Programs

Business Benefits

- Accelerate user adoption
- Improve employee productivity
- Increase platform utilization
- Reduce operational errors
- Strengthen technical capabilities
- Improve business process efficiency
- Support successful digital transformation
- Reduce dependency on external support
- Maximize return on technology investments
- Build a culture of continuous learning

Supported Platforms

Our Training & Enablement Services support:

- **RevNexure 360° Suite** – AI Revenue Assurance Platform
- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Training programs are tailored to business users, IT teams, system administrators, and executive stakeholders.

Enable People. Unlock Potential.

Technology delivers its greatest value when people know how to use it effectively. Stafron helps organizations build the knowledge, confidence, and capabilities needed to accelerate adoption and achieve long-term business success.

Learn with Confidence. Adopt with Success. Grow with Intelligence.

Production Support Services

Ensure Stability. Maximize Availability. Deliver Business Continuity.

Stafron Intelligence Corporation provides comprehensive **Production Support Services** to help Banking, Financial Services, and Capital Markets organizations maintain the availability, performance, and reliability of their mission-critical applications and platforms.

Our production support services combine proactive monitoring, rapid incident resolution, performance optimization, and continuous improvement to ensure your business operations run smoothly with minimal disruption.

Our Production Support Services

Application Support

Provide ongoing support for enterprise applications to ensure optimal performance, stability, and availability.

Incident Management

Detect, prioritize, investigate, and resolve production incidents quickly to minimize business impact.

Problem Management

Identify root causes of recurring issues and implement permanent solutions to improve system reliability.

Performance Monitoring

Continuously monitor applications, databases, APIs, integrations, and infrastructure to ensure optimal performance.

Production Monitoring

Monitor business transactions, system health, scheduled jobs, interfaces, and operational processes with proactive alerts.

Release & Deployment Support

Support production releases, patches, upgrades, and hotfix deployments with controlled change management.

Data & Integration Support

Monitor data pipelines, ETL jobs, APIs, batch processes, and enterprise integrations to ensure uninterrupted operations.

Security & Compliance Support

Maintain platform security, monitor vulnerabilities, manage access controls, and support regulatory compliance requirements.

Service Request Management

Handle user requests, configuration changes, access management, and operational support efficiently.

Continuous Improvement

Analyze production trends, optimize system performance, and implement preventive measures to improve operational excellence.

Core Capabilities

- 24×7 Production Monitoring
 - Incident & Problem Management
 - Application & Platform Support
 - Performance & Capacity Management
 - Release & Change Support
 - Data & Integration Monitoring
 - Security & Compliance Support
 - Root Cause Analysis
 - SLA-Based Service Delivery
 - Executive Reporting & Governance
 - Knowledge Management
 - Continuous Service Improvement
-

Business Benefits

- Maximize application availability
 - Reduce downtime and operational risk
 - Accelerate incident resolution
 - Improve application performance
 - Ensure business continuity
 - Strengthen operational resilience
 - Enhance user satisfaction
 - Maintain regulatory compliance
 - Optimize production stability
 - Improve overall service quality
-

Supported Platforms

Our Production Support Services support:

- **RevNexure 360° Suite** – AI Revenue Assurance Platform
- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

We also provide production support for integrated enterprise applications, databases, APIs, and cloud environments.

Keep Your Business Running with Confidence

Stafron delivers proactive, reliable, and enterprise-grade production support services that help organizations maintain high availability, operational excellence, and business continuity for their critical technology platforms.

Monitor Proactively. Resolve Rapidly. Operate Reliably.

6. Consulting

Banking Consulting

Transform Banking with Strategy, Innovation & Intelligent Technology

Stafron Intelligence Corporation provides specialized **Banking Consulting Services** to help Banking, Financial Services, and Capital Markets organizations modernize operations, optimize business performance, strengthen governance, and accelerate digital transformation.

Combining deep banking domain expertise with Artificial Intelligence, enterprise data, and intelligent automation, we help financial institutions solve complex business challenges, improve operational efficiency, and deliver sustainable business value.

Our Banking Consulting Services

Banking Transformation Strategy

Develop strategic roadmaps to modernize banking operations, technology platforms, and business models.

Revenue Assurance Consulting

Design and implement enterprise revenue assurance frameworks to identify, prevent, and recover revenue leakages across banking operations.

Business Process Optimization

Analyze and redesign banking processes to improve efficiency, reduce costs, and enhance customer experience.

Core Banking Modernization

Support the modernization and integration of core banking platforms, digital channels, and enterprise applications.

AI & Data Strategy

Define AI and enterprise data strategies that enable intelligent decision-making, automation, and innovation.

Digital Banking Advisory

Develop digital banking strategies focused on customer experience, operational excellence, and digital channel transformation.

Risk & Regulatory Advisory

Strengthen governance, risk management, regulatory compliance, and operational controls across banking operations.

Enterprise Architecture Advisory

Design scalable, API-first, cloud-ready technology architectures that support long-term business growth.

Technology Assessment

Evaluate current technology landscapes, identify improvement opportunities, and recommend future-state architectures.

Implementation Advisory

Provide expert guidance throughout solution selection, implementation, change management, and business adoption.

Core Capabilities

- Banking Strategy & Transformation
 - Revenue Assurance Consulting
 - Business Process Optimization
 - Core Banking Modernization
 - AI & Data Strategy
 - Digital Banking Advisory
 - Enterprise Architecture
 - Risk & Compliance Advisory
 - Technology Assessment
 - Implementation Advisory
 - Governance & Operating Models
 - Change Management
-

Business Benefits

- Accelerate digital transformation
 - Improve operational efficiency
 - Reduce revenue leakages and operational risks
 - Modernize banking technology platforms
 - Enable AI-driven decision-making
 - Strengthen governance and regulatory compliance
 - Improve customer experience
 - Optimize business performance
 - Increase organizational agility
 - Create sustainable business value
-

Our Consulting Approach

Assess – Understand your business, operating model, and technology landscape.

Design – Develop practical strategies, target architectures, and transformation roadmaps.

Implement – Deliver solutions using proven methodologies and industry best practices.

Optimize – Continuously improve processes, technology, and business performance.

Transform Banking with Confidence

Whether you're modernizing core banking, implementing AI, strengthening revenue assurance, or accelerating digital transformation, Stafrof provides the expertise and strategic guidance to help you achieve measurable business outcomes.

Strategic Thinking. Intelligent Solutions. Measurable Results.

AI Consulting

Accelerate AI Adoption. Unlock Intelligent Business Transformation.

Stafrof Intelligence Corporation provides **AI Consulting Services** to help Banking, Financial Services, and Capital Markets organizations successfully adopt Artificial Intelligence, Agentic AI, Machine Learning, and Generative AI to transform business operations, enhance decision-making, and create sustainable competitive advantage.

From AI strategy to enterprise deployment, we help organizations identify high-value AI opportunities, establish governance, and implement secure, scalable, and responsible AI solutions.

Our AI Consulting Services

AI Strategy & Roadmap

Develop a clear AI vision, strategy, and implementation roadmap aligned with your business objectives.

AI Readiness Assessment

Assess data maturity, technology infrastructure, governance, and organizational readiness for enterprise AI adoption.

AI Use Case Discovery

Identify, prioritize, and evaluate high-value AI use cases that deliver measurable business outcomes.

Agentic AI Strategy

Design autonomous AI agent frameworks that automate business processes and support intelligent decision-making.

Generative AI Advisory

Develop enterprise Generative AI strategies for knowledge management, intelligent search, document automation, and digital assistants.

AI Governance & Responsible AI

Establish AI governance frameworks, ethical AI principles, model monitoring, explainability, security, and regulatory compliance.

AI Solution Architecture

Design secure, scalable, and cloud-ready AI architectures that integrate seamlessly with enterprise applications and data platforms.

AI Implementation Advisory

Provide expert guidance throughout AI solution design, implementation, integration, testing, and enterprise adoption.

AI Model Lifecycle Management

Support model development, deployment, monitoring, performance optimization, and continuous improvement.

AI Change Management

Enable successful AI adoption through stakeholder engagement, user training, governance, and organizational change management.

Core Capabilities

- AI Strategy & Roadmap
 - AI Readiness Assessment
 - AI Use Case Discovery
 - Agentic AI & Multi-Agent Systems
 - Generative AI & Large Language Models (LLMs)
 - Machine Learning & Predictive Analytics
 - AI Governance & Explainability
 - AI Solution Architecture
 - AI Model Lifecycle Management
 - Enterprise AI Integration
 - Security & Responsible AI
 - Change Management & Adoption
-

Business Benefits

- Accelerate enterprise AI adoption
 - Identify high-impact AI opportunities
 - Improve operational efficiency
 - Enhance decision-making with AI insights
 - Automate complex business processes
 - Reduce operational costs
 - Strengthen AI governance and compliance
 - Minimize implementation risk
 - Scale AI securely across the enterprise
 - Drive continuous innovation and business growth
-

Powered by the Stafrof Platform

Our AI Consulting Services leverage:

- **AgenNova** – AI Intelligence Platform
- **DataXentra** – Enterprise Data Platform

Together, they provide the trusted data foundation, AI capabilities, and governance required to successfully implement enterprise AI solutions.

Transform AI into Business Value

AI is more than a technology initiative—it is a business transformation journey. Stafrof helps organizations develop practical AI strategies, implement intelligent solutions, and create measurable business outcomes with confidence.

Imagine with AI. Innovate with Intelligence. Transform with Confidence.

Data & Analytics Consulting

Transform Data into Strategic Business Intelligence

Stafrof Intelligence Corporation provides **Data & Analytics Consulting Services** to help Banking, Financial Services, and Capital Markets organizations build modern data ecosystems, strengthen governance, and unlock the full value of enterprise data through advanced analytics and Artificial Intelligence.

Our experts help organizations develop data strategies, modernize data platforms, improve data quality, and deliver actionable insights that drive informed decision-making and digital transformation.

Our Data & Analytics Consulting Services

Data Strategy & Roadmap

Develop enterprise data strategies and transformation roadmaps aligned with business objectives and digital initiatives.

Enterprise Data Architecture

Design scalable, cloud-ready, and AI-enabled data architectures that support enterprise-wide data management and analytics.

Data Governance

Establish governance frameworks, policies, metadata management, data stewardship, and regulatory compliance.

Data Quality Management

Assess, cleanse, standardize, validate, and continuously improve enterprise data quality.

Data Integration & Modernization

Integrate and modernize data across Core Banking Systems, enterprise applications, cloud platforms, APIs, and external data sources.

Master Data Management (MDM)

Create a trusted, consistent view of customers, products, accounts, and reference data across the enterprise.

Business Intelligence & Analytics

Design executive dashboards, operational reports, KPI frameworks, and self-service analytics solutions.

Advanced Analytics

Leverage predictive analytics, machine learning, and AI-driven insights to improve business performance and decision-making.

Data Platform Advisory

Support the selection, implementation, optimization, and modernization of enterprise data platforms and analytics ecosystems.

Data Privacy & Compliance

Ensure data security, privacy, governance, and compliance with organizational and regulatory requirements.

Core Capabilities

- Data Strategy & Advisory
 - Enterprise Data Architecture
 - Data Engineering & Integration
 - Data Governance & Quality
 - Master Data Management (MDM)
 - Business Intelligence & Reporting
 - Predictive & Advanced Analytics
 - AI-Ready Data Foundations
 - Data Privacy & Compliance
 - Cloud Data Modernization
 - Executive Dashboards
 - Data Platform Optimization
-

Business Benefits

- Build a trusted enterprise data foundation
 - Improve data quality and governance
 - Accelerate analytics and AI initiatives
 - Enable faster, data-driven decision-making
 - Reduce data silos and operational complexity
 - Strengthen regulatory compliance
 - Increase business agility and operational efficiency
 - Optimize technology investments
 - Support enterprise-wide digital transformation
 - Drive sustainable business growth
-

Powered by the Stafrof Platform

Our Data & Analytics Consulting Services leverage:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, they provide the technology foundation for modern data management, advanced analytics, and AI-driven decision-making.

Build a Data-Driven Enterprise

Data is your organization's most valuable asset. Stafrof helps you transform enterprise data into trusted intelligence, enabling smarter decisions, greater innovation, and measurable business outcomes.

Trusted Data. Actionable Insights. Smarter Decisions.

Digital Transformation Consulting

Transform Business. Accelerate Innovation. Create Lasting Value.

Stafron Intelligence Corporation provides **Digital Transformation Consulting Services** to help Banking, Financial Services, and Capital Markets organizations modernize technology, optimize operations, and accelerate business transformation through Artificial Intelligence, enterprise data, and intelligent automation.

Our consultants work closely with business and technology leaders to develop practical transformation strategies, modernize legacy environments, and implement scalable digital solutions that deliver measurable business outcomes.

Our Digital Transformation Consulting Services

Digital Strategy & Roadmap

Develop a comprehensive digital transformation strategy aligned with business objectives, technology priorities, and long-term growth.

Business Process Transformation

Analyze, redesign, and optimize business processes to improve efficiency, agility, and customer experience.

Legacy Modernization

Modernize legacy applications, core banking platforms, and enterprise systems using cloud-native and API-first architectures.

Enterprise Data Transformation

Build modern data platforms that provide trusted, AI-ready data for analytics, automation, and intelligent decision-making.

AI & Intelligent Automation Strategy

Identify opportunities to leverage Artificial Intelligence, Agentic AI, Machine Learning, and automation to improve business performance.

Cloud Transformation

Develop cloud adoption strategies and modernize applications and data across public, private, and hybrid cloud environments.

Enterprise Integration Strategy

Design API-first and event-driven integration architectures that connect applications, data, and business processes.

Customer Experience Transformation

Create digital-first customer journeys that improve engagement, service quality, and operational efficiency.

Technology & Enterprise Architecture

Design secure, scalable, and future-ready enterprise architectures that support business growth and innovation.

Change Management & Adoption

Enable successful transformation through stakeholder engagement, governance, training, and organizational change management.

Core Capabilities

- Digital Transformation Strategy
 - Business Process Optimization
 - Legacy Modernization
 - Enterprise Data Modernization
 - AI & Intelligent Automation Strategy
 - Cloud Transformation
 - API & Enterprise Integration
 - Enterprise Architecture
 - Customer Experience Transformation
 - Change Management
 - Governance & Compliance
 - Technology Advisory
-

Business Benefits

- Accelerate digital transformation initiatives
 - Modernize legacy technology environments
 - Improve operational efficiency and agility
 - Enhance customer experience
 - Enable AI-driven innovation
 - Reduce operational complexity and costs
 - Strengthen security and regulatory compliance
 - Improve scalability and business resilience
 - Increase return on technology investments
 - Create long-term competitive advantage
-

Powered by the Stafrof Platform

Our Digital Transformation Consulting Services leverage:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform
- **RevNexure 360° Suite** – AI Revenue Assurance Platform

These platforms provide the trusted data, AI capabilities, and intelligent automation needed to support successful enterprise transformation.

Transform with Confidence

Digital transformation is a journey that combines strategy, technology, and people. Stafrof partners with financial institutions to deliver practical, scalable, and future-ready transformation programs that create measurable business value.

Strategy. Innovation. Transformation.

Enterprise Architecture Consulting

Design the Future. Build with Confidence. Scale with Intelligence.

Stafron Intelligence Corporation provides **Enterprise Architecture Consulting Services** to help Banking, Financial Services, and Capital Markets organizations design scalable, secure, and future-ready technology architectures that support business growth, digital transformation, and innovation.

Our consultants align business strategy with technology by developing enterprise architectures that improve agility, simplify complexity, accelerate modernization, and enable AI-driven innovation.

Our Enterprise Architecture Consulting Services

Enterprise Architecture Strategy

Develop enterprise architecture roadmaps that align technology investments with business goals and digital transformation initiatives.

Business Architecture

Design business capabilities, operating models, value streams, and process frameworks that support strategic objectives.

Application Architecture

Modernize enterprise applications and design scalable, modular, and API-first application architectures.

Data Architecture

Design enterprise data architectures that support trusted data, analytics, Artificial Intelligence, and regulatory compliance.

Integration Architecture

Develop API-first, event-driven, and microservices-based integration architectures that seamlessly connect enterprise systems.

Cloud Architecture

Design secure, resilient, and scalable cloud architectures across public, private, and hybrid cloud environments.

AI Architecture

Define enterprise AI architectures that integrate Machine Learning, Generative AI, Agentic AI, and intelligent automation into business operations.

Technology Modernization

Assess existing technology landscapes and develop modernization roadmaps for legacy systems and enterprise platforms.

Security Architecture

Embed cybersecurity, identity management, privacy, and compliance into every layer of the enterprise architecture.

Architecture Governance

Establish architecture standards, governance frameworks, technology principles, and best practices to ensure long-term consistency and scalability.

Core Capabilities

- Enterprise Architecture Strategy
 - Business & Application Architecture
 - Enterprise Data Architecture
 - API & Integration Architecture
 - Cloud & Hybrid Architecture
 - AI & Intelligent Automation Architecture
 - Technology Modernization
 - Security & Compliance Architecture
 - Architecture Governance
 - Technology Assessment
 - Roadmaps & Reference Architectures
 - Solution Design & Advisory
-

Business Benefits

- Align technology with business strategy
 - Accelerate digital transformation
 - Simplify complex technology landscapes
 - Improve enterprise agility and scalability
 - Enable AI-ready architectures
 - Strengthen security and governance
 - Reduce technology risk and technical debt
 - Improve system interoperability
 - Optimize technology investments
 - Build a future-ready enterprise
-

Powered by the Stafrof Platform

Our Enterprise Architecture Consulting Services leverage:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform
- **RevNexure 360° Suite** – AI Revenue Assurance Platform

Together, they provide a modern architectural foundation for AI, enterprise data, intelligent automation, and digital transformation.

Architect the Future of Your Enterprise

A strong enterprise architecture is the foundation of successful digital transformation. Stafrof helps organizations design intelligent, resilient, and scalable architectures that accelerate innovation and deliver lasting business value.

Architect for Today. Build for Tomorrow.

Analytics Consulting

Transform Data into Actionable Business Intelligence

Stafron Intelligence Corporation provides **Analytics Consulting Services** to help Banking, Financial Services, and Capital Markets organizations harness the power of data, advanced analytics, and Artificial Intelligence to make informed decisions, improve business performance, and accelerate digital transformation.

Our consulting services enable organizations to build modern analytics capabilities that deliver real-time insights, predictive intelligence, and measurable business value.

Our Analytics Consulting Services

Analytics Strategy & Roadmap

Develop an enterprise analytics strategy and implementation roadmap aligned with business goals and digital transformation initiatives.

Business Intelligence Consulting

Design executive dashboards, operational reports, KPI frameworks, and self-service analytics solutions for better decision-making.

Advanced Analytics

Leverage predictive analytics, statistical modeling, and machine learning to uncover trends, forecast outcomes, and optimize business performance.

Executive Dashboards

Create interactive executive dashboards that provide real-time visibility into business performance, operational metrics, and strategic KPIs.

Customer Analytics

Analyze customer behavior, segmentation, profitability, engagement, and lifetime value to enhance customer experience and drive growth.

Revenue & Financial Analytics

Measure revenue performance, profitability, pricing effectiveness, operational costs, and financial trends to support strategic planning.

Operational Analytics

Monitor operational performance, process efficiency, productivity, and service levels to identify opportunities for continuous improvement.

AI-Powered Analytics

Integrate Artificial Intelligence and Machine Learning into analytics to deliver predictive insights, anomaly detection, and intelligent recommendations.

Regulatory & Risk Analytics

Strengthen compliance, risk management, and regulatory reporting through data-driven analytics and real-time monitoring.

Analytics Platform Advisory

Support the design, implementation, optimization, and modernization of enterprise analytics platforms.

Core Capabilities

- Analytics Strategy & Advisory
- Business Intelligence & Reporting

- Executive Dashboards
 - Predictive & Prescriptive Analytics
 - AI-Powered Analytics
 - Customer & Revenue Analytics
 - Operational Performance Analytics
 - Risk & Compliance Analytics
 - KPI Framework Design
 - Self-Service Analytics
 - Enterprise Data Visualization
 - Analytics Platform Optimization
-

Business Benefits

- Enable faster, data-driven decision-making
 - Gain real-time visibility into business performance
 - Improve operational efficiency
 - Identify growth opportunities and business risks
 - Enhance customer insights and engagement
 - Optimize revenue and profitability
 - Strengthen regulatory compliance
 - Accelerate AI and analytics adoption
 - Improve executive reporting and governance
 - Drive sustainable business growth
-

Powered by the Stafrof Platform

Our Analytics Consulting Services leverage:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform

Together, they provide the trusted data foundation and advanced analytics capabilities needed to transform enterprise data into strategic business intelligence.

Turn Insights into Business Value

Analytics is more than reporting—it is a strategic capability that enables organizations to anticipate change, improve performance, and make confident decisions. Stafrof helps financial institutions build modern analytics capabilities that drive measurable business outcomes.

Analyze Smarter. Decide Faster. Grow Stronger.

Risk & Compliance Consulting

Strengthen Governance. Mitigate Risk. Ensure Regulatory Compliance.

Stafrof Intelligence Corporation provides **Risk & Compliance Consulting Services** to help Banking, Financial Services, and Capital Markets organizations strengthen

governance, proactively manage risk, and meet evolving regulatory requirements through intelligent processes, enterprise data, and AI-driven insights.

Our consultants work with business and technology leaders to design practical risk management frameworks, improve compliance capabilities, and build resilient operating models that support sustainable growth.

Our Risk & Compliance Consulting Services

Enterprise Risk Strategy

Develop enterprise risk management frameworks, governance models, and risk operating models aligned with business objectives.

Regulatory Compliance Advisory

Assess regulatory requirements, identify compliance gaps, and implement effective compliance strategies and controls.

Operational Risk Consulting

Evaluate operational risks, strengthen internal controls, and improve business resilience through proactive risk management.

Financial Crime Advisory

Enhance Anti-Money Laundering (AML), Know Your Customer (KYC), sanctions screening, and fraud prevention capabilities.

Risk Assessment & Control Review

Identify business, technology, operational, and process risks while recommending effective mitigation strategies.

Governance Framework Design

Design governance structures, policies, standards, and oversight processes that support accountability and regulatory compliance.

Data Governance & Privacy

Establish enterprise data governance, privacy controls, information security practices, and regulatory compliance frameworks.

AI Governance & Responsible AI

Develop governance frameworks for Artificial Intelligence, ensuring transparency, explainability, security, ethical AI practices, and regulatory compliance.

Audit Readiness

Prepare organizations for internal and external audits through control assessments, documentation reviews, and compliance validation.

Risk Analytics & Reporting

Design executive dashboards, regulatory reports, key risk indicators (KRIs), and AI-powered risk intelligence for proactive decision-making.

Core Capabilities

- Enterprise Risk Management
- Regulatory Compliance
- Operational Risk
- AML, KYC & Financial Crime Advisory

- Governance & Internal Controls
 - Data Governance & Privacy
 - AI Governance & Responsible AI
 - Audit & Compliance Readiness
 - Risk Analytics & Reporting
 - Risk Assessment & Gap Analysis
 - Policy & Framework Development
 - Executive Risk Dashboards
-

Business Benefits

- Strengthen governance and internal controls
 - Improve regulatory compliance and audit readiness
 - Reduce operational and compliance risks
 - Enhance fraud prevention and financial crime controls
 - Improve risk visibility through real-time analytics
 - Support AI governance and responsible AI adoption
 - Increase operational resilience
 - Improve executive decision-making
 - Protect organizational reputation
 - Build a culture of compliance and accountability
-

Powered by the Stafrof Platform

Our Risk & Compliance Consulting Services leverage:

- **DataXentra** – Enterprise Data Platform
- **AgenNova** – AI Intelligence Platform
- **RevNexure 360° Suite** – AI Revenue Assurance Platform

Together, they provide trusted enterprise data, AI-driven intelligence, and advanced analytics to strengthen governance, risk management, and regulatory compliance.

Build a Resilient, Compliant Enterprise

Effective risk management is a strategic advantage. Stafrof helps financial institutions establish modern governance frameworks, manage emerging risks, and confidently navigate an evolving regulatory landscape.

Manage Risk. Ensure Compliance. Build Trust.

Product Advisory Consulting

From Vision to Market Success

Stafrof Intelligence Corporation provides **Product Advisory Consulting Services** to help Banking, Financial Services, and Capital Markets organizations design, develop, modernize, and scale innovative digital products and platforms.

Our consultants combine deep banking domain expertise, product strategy, enterprise architecture, AI, and data engineering to help organizations transform

ideas into successful, customer-centric products that deliver measurable business value.

Our Product Advisory Consulting Services

Product Strategy

Define product vision, business objectives, market positioning, and growth strategies aligned with organizational goals.

Product Discovery

Identify customer needs, validate business opportunities, prioritize use cases, and define product requirements.

Product Roadmap

Develop strategic product roadmaps, release plans, and feature prioritization based on business value and customer needs.

Product Architecture

Design scalable, secure, API-first, and cloud-ready product architectures that support long-term growth.

Product Modernization

Assess and modernize legacy products with AI, enterprise data, intelligent automation, and modern technologies.

AI-Powered Product Innovation

Identify opportunities to embed Artificial Intelligence, Agentic AI, Machine Learning, and Generative AI into digital products.

Product Experience Design

Create intuitive, user-centric product experiences using design thinking and customer-centric design principles.

Go-to-Market (GTM) Strategy

Develop product launch strategies, pricing approaches, commercialization plans, and market adoption frameworks.

Product Governance

Establish product operating models, governance frameworks, lifecycle management, and performance measurement.

Product Optimization

Continuously evaluate product performance, customer feedback, and analytics to improve adoption, engagement, and business outcomes.

Core Capabilities

- Product Strategy & Vision
- Product Discovery & Innovation
- Product Roadmap Planning
- Product Architecture
- AI-Powered Product Design
- Digital Product Modernization
- Customer Experience Design

- Go-to-Market Strategy
 - Product Governance
 - Product Performance Analytics
 - Agile Product Management
 - Product Lifecycle Management
-

Business Benefits

- Accelerate product innovation
 - Reduce product development risk
 - Improve customer experience
 - Shorten time-to-market
 - Build scalable and future-ready products
 - Enable AI-driven product capabilities
 - Increase product adoption and customer engagement
 - Improve return on product investments
 - Strengthen competitive differentiation
 - Drive sustainable business growth
-

Our Consulting Approach

Discover – Understand market opportunities, customer needs, and business objectives.

Design – Define product strategy, architecture, user experience, and roadmap.

Build – Support product development, implementation, and go-to-market execution.

Optimize – Continuously improve product performance through analytics, customer feedback, and innovation.

Turn Great Ideas into Successful Products

Successful products combine strategy, technology, and customer insight. Stafrof helps financial institutions create intelligent, scalable, and market-ready products that deliver lasting business value.

Imagine. Innovate. Launch. Grow.
